

Infrared and Raman Spectra of Inorganic and Coordination Compounds

*Part A: Theory and Applications
in Inorganic Chemistry*

Fifth Edition

Kazuo Nakamoto

A WILEY-INTERSCIENCE PUBLICATION

John Wiley & Sons, Inc.

NEW YORK / CHICHESTER / WEINHEIM / BRISBANE / SINGAPORE / TORONTO

Contents

Contents of Part B	ix
Preface	xi
Abbreviations	xiii
Section I. Theory of Normal Vibrations	1
I-1. Origin of Molecular Spectra / 1	
I-2. Origin of Infrared and Raman Spectra / 6	
I-3. Vibration of a Diatomic Molecule / 10	
I-4. Normal Coordinates and Normal Vibrations / 16	
I-5. Symmetry Elements and Point Groups / 23	
I-6. Symmetry of Normal Vibrations and Selection Rules / 27	
I-7. Introduction to Group Theory / 37	
I-8. The Number of Normal Vibrations for Each Species / 42	
I-9. Internal Coordinates / 49	
I-10. Selection Rules for Infrared and Raman Spectra / 53	
I-11. Structure Determination / 60	
I-12. Principle of the GF Matrix Method / 63	
I-13. Utilization of Symmetry Properties / 71	
I-14. Potential Fields and Force Constants / 77	
I-15. Solution of the Secular Equation / 80	
I-16. Vibrational Frequencies of Isotopic Molecules / 83	
I-17. Metal-Isotope Spectroscopy / 85	
I-18. Group Frequencies and Band Assignments / 88	
I-19. Intensity of Infrared Absorption / 95	

- I-20. Depolarization of Raman Lines / 97
- I-21. Intensity of Raman Scattering / 102
- I-22. Principle of Resonance Raman Spectroscopy / 106
- I-23. Resonance Raman Spectra / 109
- I-24. Vibrational Spectra in Gaseous Phase and Inert Gas
Matrices / 113
- I-25. Symmetry in Crystals / 117
- I-26. Vibrational Analysis of Crystals / 124
- I-27. The Correlation Method / 127
- I-28. Lattice Vibrations / 132
- I-29. Polarized Spectra of Single Crystals / 136
- I-30. Vibrational Analysis of Ceramic Superconductors / 141
- References / 145

Section II. Applications in Inorganic Chemistry

153

- II-1. Diatomic Molecules / 153
- II-2. Triatomic Molecules / 162
- II-3. Pyramidal Four-Atom Molecules / 173
- II-4. Planar Four-Atom Molecules / 180
- II-5. Other Four-Atom Molecules / 184
- II-6. Tetrahedral and Square-Planar Five-Atom Molecules / 189
- II-7. Trigonal-Bipyramidal and Tetragonal-Pyramidal XY_5 and
Related Molecules / 209
- II-8. Octahedral Molecules / 214
- II-9. XY_7 and XY_8 Molecules / 226
- II-10. X_2Y_4 and X_2Y_6 Molecules / 228
- II-11. X_2Y_7 , X_2Y_8 , X_2Y_9 , and X_2Y_{10} Molecules / 236
- II-12. Metal Cluster Compounds / 240
- II-13. Compounds of Boron / 243
- II-14. Compounds of Carbon / 248
- II-15. Compounds of Silicon and Germanium / 256
- II-16. Compounds of Nitrogen / 261
- II-17. Compounds of Phosphorous and Other Group VB
Elements / 265
- II-18. Compounds of Sulfur and Selenium / 271
- References / 276

Appendices

321

- I. Point Groups and Their Character Tables / 321
- II. Matrix Algebra / 335
- III. General Formulas for Calculating the Number of Normal
Vibrations in Each Species / 341
- IV. Direct Products of Irreducible Representations / 344

- V. Number of Infrared- and Raman-Active Stretching
Vibrations for MX_nY_m -Type Molecules / 346
- VI. Derivation of Equation 12.3 of Section I / 347
- VII. The **G** and **F** Matrix Elements of Typical Molecules / 350
- VIII. Group Frequency Charts / 356
- IX. Correlation Tables / 361
- X. Site Symmetry for the 230 Space Groups / 374

Index**383**
