Invited Talk 1

Mobile Objects and Mobile Agents: The Future of Distributed Computing? . 1

Danny B. Lange (General Magic, Inc.)

Modelling Ideas and Experiences

The M.A.D. Experience: Multiperspective Application Development in
Evolutionary Prototyping 13

*Michael Christensen, Andy Crabtree, Christian Heide Damm, Klaus
Marius Hansen, Ole Lehrmann Madsen, Pernille Marquardsen,
Preben Mogensen, Elmer Sandvad, Lennert Sloth and Michael
Thomsen (Department of Computer Science, University of Aarhus)*

Extending the ODMG Object Model with Time 41

*Elisa Bertino, Elena Ferrari (Dipartimento di Scienze
dell'Informazione, Università degli Studi di Milano), Giovanna
Guerrini and Isabella Merlo (Dipartimento di Informatica e Scienze
dell'Informazione, Università di Genova)*

Modelica - A Unified Object-Oriented Language for System Modeling and
Simulation 67

*Peter Fritzson and Vadim Engelson (Dept. of Computer and
Information Science, Linköping University)*

Design Patterns and Frameworks

Synthesizing Object-Oriented and Functional Design to Promote Re-use ... 91

*Shriram Krishnamurthi, Matthias Felleisen and Daniel P. Friedman
(Rice University)*

Precise Visual Specification of Design Patterns 114

Anthony Lauder and Stuart Kent (University of Brighton)

Framework Design for End-to-End Optimization 135

*Aamod Sane (Icon Computing Inc.), Ashish Singhai and Roy
H. Campbell (University of Illinois at Urbana-Champaign)*

Language Problems and Solutions

Flexible Alias Protection	158
<i>James Noble (Microsoft Research Institute, Macquarie University), Jan Vitek (Université de Genève) and John Potter (Microsoft Research Institute, Macquarie University)</i>	
Predicate Dispatching: A Unified Theory of Dispatch	186
<i>Michael Ernst, Craig Kaplan and Craig Chambers (University of Washington)</i>	
Orthogonal to the Java Imperative	212
<i>Suad Alagić, Jose Solorzano and David Gitchell (Wichita State University)</i>	

Distributed Memory Systems

Modelling a Distributed Cached Store for Garbage Collection: The Algorithm and Its Correctness Proof	234
<i>Paulo Ferreira (INESC/IST) and Marc Shapiro (INRIA)</i>	
Cyclic Distributed Garbage Collection with Group Merger	260
<i>Helena Rodrigues and Richard Jones (University of Kent)</i>	
Experiences Developing a Virtual Shared Memory System Using High-Level Object Paradigms	285
<i>Jörg Cordsen, Jörg Nolte (GMD FIRST) and Wolfgang Schröder-Preikschat (University of Magdeburg)</i>	

Reuse, Adaption and Hardware Support

Binary Component Adaptation	307
<i>Ralph Keller and Urs Hölzle (University of California, Santa Barbara)</i>	
Object-Oriented Architectural Support for a Java Processor	330
<i>N. Vijaykrishnan, N. Ranganathan (Center for Microelectronics Research, Department of CSE, Univ. of South Florida, Tampa) and Ravi Gadekarla (Bell South Communications, Birmingham, Alabama)</i>	
A Study of the Fragile Base Class Problem	355
<i>Leonid Mikhajlov (Turku Centre for Computer Science) and Emil Sekerinski (McMaster University)</i>	

Invited Talk 2

Providing Orthogonal Persistence for Java	383
<i>Malcolm Atkinson (University of Glasgow) and Mick Jordan (Sun Microsystems Laboratories)</i>	

Reflection

Wrappers to the Rescue	396
<i>John Brant, Brian Foote, Ralph E. Johnson and Donald Roberts (University of Illinois at Urbana-Champaign)</i>	
Design and Partial Evaluation of Meta-objects for a Concurrent Reflective Language	418
<i>Hidehiko Masuhara and Akinori Yonezawa (University of Tokyo)</i>	
Reflection for Statically Typed Languages	440
<i>José de Oliveira Guimarães (Universidade Federal de São Carlos)</i>	

Extensible Objects and Types

An Imperative, First-Order Calculus with Object Extension	462
<i>Viviana Bono (Dipartimento di Informatica dell'Università di Torino) and Kathleen Fisher (AT&T Labs—Research)</i>	
On Object Extension	498
<i>Luigi Liquori (Dipartimento di Matematica ed Informatica dell'Università di Udine)</i>	
A Statically Safe Alternative to Virtual Types	523
<i>Kim Bruce (Williams College), Martin Odersky (University of South Australia) and Philip Wadler (Bell Labs, Lucent Technology)</i>	

Mixins, Inheritance and Type Analysis Complexity

Implementing Layered Designs with Mixin Layers	550
<i>Yannis Smaragdakis and Don Batory (University of Texas at Austin)</i>	
Classifying Inheritance Mechanisms in Concurrent Object Oriented Programming	571
<i>Lobel Crnogorac (The University of Melbourne), Anand S. Rao (Mitchell Madison Group) and Kotagiri Ramamohanarao (The University of Melbourne)</i>	

The Complexity of Type Analysis of Object Oriented Programs 601
 *Joseph (Yossi) Gil (IBM T.J. Watson Research Center) and Alon
 Itai (TechnionIIT)*

Author Index 635
