# Induced Responses to Herbivory

Technische Universität Darmstadt  
FACHBEREICH 10 — BIOLOGIE  
— Bibliothek —  
Schnittspahnstraße 10  
D-64287 Darmstadt

Inv.-Nr. 14469  
.....

The University of Chicago Press  
*Chicago and London*

# Contents

Acknowledgments	ix
1 An Introduction to the Phenomena and Phenomenology of Induction	1
1.1 Plants Are Defended against Many Threats	1
1.2 Definitions	3
1.3 A Brief History of a Young Field	5
2 How a Plant Perceives Damage and Signals Other Ramets, and the Specificity of these Processes	12
2.1 Introduction	12
2.2 Cues and the Specificity of Responses	14
2.3 Signals in Systemic Induction	26
2.4 Communication between Individuals	40
3 Mechanisms of Induced Responses	47
3.1 Comparison of Mechanistic and Bioassay Approaches toward an Understanding of the Function of Induced Responses	47
3.2 Overview of Mechanisms	54
3.3 Mechanisms Responsible for Induced Increases in Chemicals	71
3.4 Future Directions: Bringing the Plant Back into Plant-Herbivore Interactions	100
4 Induced Resistance against Herbivores	104
4.1 Effects on Performance of Bioassay Herbivores as Evidence of Induced Resistance and Susceptibility	104

4.2	Where Is Induced Resistance Found?	107
4.3	Does Induced Resistance Affect Herbivore Populations?	150
4.4	Does Induced Resistance Drive Cycles of Herbivore Outbreaks?	156
4.5	Future Directions: Extending Our Knowledge to the Population and Community Levels	165
5	Induced Defense and the Evolution of Induced Resistance	167
5.1	Evolutionary Processes and Induced Responses	167
5.2	Induced Defenses as Incidental Effects of Defoliation or Evolved Responses to Herbivory: A Bogus Dichotomy?	187
5.3	Costly Defenses and Evolutionary Hypotheses to Explain Induced Defenses	190
5.4	Other Evolutionary Explanations for Induced Defenses	210
5.5	Future Directions: Generating and Testing Evolutionary Hypotheses about Induced Defenses	223
6	Using Induced Resistance in Agriculture	225
6.1	Induced Resistance for Disease Control in Medicine and Plant Pathology	225
6.2	Strategies Using Induced Resistance for Control of Herbivore Pests	229
6.3	Prospectus for Agricultural Uses	244
6.4	Conclusion	244
	References	249
	Index	301
