1	Introduction	1
	Notes	7
2	Preliminaries	9
2.1	Classical Sets	9
2.1.1	Set Inclusion and Characteristic Function	9
2.1.2	Operations on Sets	12
2.1.3	Classes of Sets	17
2.1.4	Atoms and Holes	26
2.1.5	S -Compact Space	31
2.1.6	Relations, Posets, and Lattices	34
2.2	Classical Measures	37
2.3	Fuzzy Sets	43
	Notes	53
	Exercises	55
3	Basic Ideas of Generalized Measure Theory	61
3.1	Generalizing Classical Measures	61
3.2	Monotone Measures	63
3.3	Superadditive and Subadditive Measures	67
3.4	Signed General Measures	68
	Notes	70
	Exercises	71
4	Special Areas of Generalized Measure Theory	73
4.1	An Overview	73
4.2	Choquet Capacities	74
4.3	λ -Measures	77
4.4	Quasi-Measures	85
4.5	Belief Measures and Plausibility Measures	89
4.6	Possibility Measures and Necessity Measures	98
4.7	Properties of Finite Monotone Measures	103

Notes	104
Exercises	106
5 Extensions	111
5.1 A General Discussion on Extensions	111
5.2 Extension of Quasi-Measures and λ -Measures	112
5.3 Extension of Semicontinuous Monotone Measures	116
5.4 Absolute Continuity and Extension of Monotone Measures	120
5.5 Extension of Possibility Measures and Necessity Measures	123
Notes	130
Exercises	130
6 Structural Characteristics for Set Functions	133
6.1 Null-Additivity	133
6.2 Autocontinuity	135
6.3 Uniform Autocontinuity	143
6.4 Structural Characteristics of Monotone Set Functions	144
6.5 Monotone Measures on S -Compact Space	147
Notes	148
Exercises	148
7 Measurable Functions on Monotone Measure Spaces	151
7.1 Measurable Functions	151
7.2 “Almost” and “Pseudo-Almost”	153
7.3 Relation Among Convergences of Measurable Function Sequence	156
7.4 Convergences of Measurable Function Sequence on Possibility Measure Spaces	162
Notes	164
Exercises	164
8 Integration	167
8.1 The Lebesgue Integral	167
8.2 Properties of the Lebesgue Integral	170
8.3 Lebesgue Integrals on Finite Sets	172
8.4 A General View of Integration on Finite Sets	174
Notes	177
Exercises	177
9 Sugeno Integrals	179
9.1 Definition	179
9.2 Properties of the Sugeno Integral	183
9.3 Convergence Theorems of the Sugeno Integral Sequence	191
9.4 Transformation Theorem for Sugeno Integrals	202

9.5	Monotone Measures Defined by Sugeno Integrals	203
9.6	More Results on Sugeno Integrals with Respect to a Monotone Measure	205
	Notes	207
	Exercises	208
10	Pan-Integrals	213
10.1	Pan-Additions and Pan-Multiplications	213
10.2	Definition of Pan-Integrals	214
10.3	Properties of Pan-Integral	218
10.4	A Transformation Theorem	220
	Notes	222
	Exercises	223
11	Choquet Integrals	225
11.1	Choquet Integrals for Nonnegative Functions	225
11.2	Properties of the Choquet Integral	227
11.3	Translatable and Symmetric Choquet Integrals	230
11.4	Convergence Theorems	234
11.5	Choquet Integrals on Finite Sets	239
11.6	An Alternative Calculation Formula	243
	Notes	245
	Exercises	245
12	Upper and Lower Integrals	247
12.1	Definitions	247
12.2	Properties	249
12.3	Relations Between Integrals	256
12.4	Lower and Upper Integrals on Finite Sets	265
12.5	Uncertainty Carried by Monotone Measures	269
	Notes	272
	Exercises	273
13	Constructing General Measures	275
13.1	An Overview	275
13.2	Constructing New Measures via Integration	276
13.3	Constructing New Measures by Transformations	277
13.4	Constructing New Measures by Identification and Extension	278
13.5	Data-Driven Construction Methods	279
13.6	Other Construction Methods	282
	13.6.1 Methods Based on Modal Logic	282
	13.6.2 Methods Based on Uncertainty Principles	283
	Notes	284

14	Fuzzification of Generalized Measures and the Choquet Integral. . . .	285
14.1	Conventions	285
14.2	Monotone Measures Defined on Fuzzy σ -Algebras	285
14.3	The Choquet Extension	286
14.4	Structural Characteristics of Monotone Measures on Fuzzy -Algebras.	287
14.5	Hereditability of Structural Characteristics	289
14.6	Real-Valued Choquet Integrals with Fuzzy-Valued Integrands.	294
	Notes.	302
15	Applications of Generalized Measure Theory	303
15.1	General Remarks	303
15.2	Generalized Information Theory: An Overview	305
15.3	Theories of Imprecise Probabilities	307
15.4	Classification of Pairs of Dual Measures.	313
15.5	Utility of Some Special Theories of Imprecise Probabilities	318
15.5.1	Dempster–Shafer Theory (DST)	318
15.5.2	Possibility Theory	324
15.6	Information Fusion	326
15.7	Multiregression.	333
15.8	Classification	335
15.9	Other Applications: An Overview	337
	Notes.	338
	Exercises	340
	Appendix A	343
	Appendix B	351
	Bibliography	355
	Subject Index	373
	Name Index	379
