Amino acids and nitrogen

1.	Studies on optimum tryptophan to lysine ratio in wheat-barley or corn based diets for growing pigs	19
	M. Naatjes, J. K. Htoo, K.H. Tölle and A. Susenbeth – Kiel/Hanau/Blekendorf	
2.	Protein evaluation of horse feed – a novel concept	20
	Annette Zeyner, Susanne Kirchhof, A. Susenbeth, K.-H. Südekum and Ellen Kienzle - Rostock/Stuttgart-Hohenheim/Kiel/Bonn/Munich	
3.	Methionine efficiency in chicken diets with varying Met to Cys ratio modifies the concluded Met requirements	21
	Jaqueline Farke, C. Wecke and F. Liebert – Göttingen	
4.	Effects of maternal protein intake during pregnancy on body composition and skeletal muscle properties of newborn piglets	22
	Claudia Kalbe, Jana Block, L. Lefaucheur, B. Stabenow, W. Otten, Cornelia C. Metges and Charlotte Rehfeldt – Dummerstorf/Saint Gilles	
5.	Effect of age on the precaecal amino acid digestibility in broilers	23
	M. Petzold, C. Georgi and H. Kluth – Halle (Saale)	
6.	Optimal sulphur amino acids to lysine ratio in grower phase (day 14-35) in Ross 308 broilers	24
	Ariane Helmbrecht, Evelien Hangoor, P.J.A. Wijtten, J.K.W.M. Sparla and A. Lemme – Hanau/Rotterdam	
7.	Methionine efficiency in a diet for Tilapia (<i>Oreochromis niloticus</i>) with different methionine supplements	25
	Wen Gao, F. Liebert and A. Lemme – Göttingen/Hanau	
8.	Responses of common carp (<i>Cyprinus carpio</i> L.) to DL-methionine supplementation at different feeding	26
	F.J. Schwarz, A. Lemme, L.C. Nwana and A. Metwally – Freising-Weihenstephan/Hanau	
9.	Further results about comparison of different procedures for determination of apparent digestibility of crude protein in poultry diets	27
	Angela Stünder, Petra Wolf, J. Kamphues and F. Liebert – Göttingen/Hannover	
10.	Effects of maternal protein supply during pregnancy on the somatotrophic axis in offspring: IGF-binding proteins -2 and -3 in piglets at weaning	28
	Anika Ooster, Ute Müller, Helga Sauerwein, Iris Lang, Maria Peters, Charlotte Rehfeldt and Cornelia C. Metges – Bonn/Dummerstorf	
11.	Effects of varying ruminal N-balance (RNB) on performance of dairy cows	29
	T. Ettle, A. Obermaier and H. Spiekers – Grub	

Minerals

12.	Influence of supplementation of 25-hydroxyvitamin D₃ combined with an acidifying diet on the calcium metabolism in periparturient dairy cows	30
	Inga Oberheide, Mirja Wilkens, Elisabeth Azem, B. Schröder and G. Breves – Hannover/Basel	
13.	Time course of calcium and vitamin D-deficiency on bone metabolism and fat absorption in minipigs	31
	Katharina E. Scholz-Ahrens, C.-C. Glüer and J. Schrezenmeir – Kiel/Karlsruhe	
14.	Effects of organic zinc sources compared to zinc sulphate on growth performance and on the zinc status of weaned piglets	32
	Brigitte R. Paulicks, Hanna Ingenkamp and K. Eder – Freising-Weihenstephan/Gießen	
15.	Effects of selenium (Se) supplementation on Se concentrations and GPx activities in different tissues in fallow deer	33
	Ingrid Vervuert, Sophie Stoebe, Erika Most, J. Pallauf, A. Mueller and M. Coenen – Leipzig/Gießen/Halle	
16.	Effect of acacia tannins on mineral utilisation in lambs	34
	H.D. Hess and Frigga Dohme – Posieux	
17.	Effect of rapeseed expeller on the iodine and thyroid hormone status of high-yielding dairy cows	35
	F. Schöne, C. Koch, M. Leiterer, F.-J. Romberg, H. Steingäß and K.-H. Südekum – Jena/Münchweiler/Stuttgart-Hohenheim/Bonn	
18.	Effects of three different organic zinc sources in comparison to zinc sulphate on production and physiological parameters in weaned piglets	36
	Felicitas Siebert, Erika Most and J. Pallauf – Giessen	
19.	Preliminary studies on the postprandial changes in the phosphorus homeostasis in pigs after intake of different phosphorus sources	37
	Katharina Hoffmann, M. Coenen and J. Liese – Leipzig	
20.	Influence of two different selenium sources on performance of laying hens	38
	Ingrid Halle and H. Schenkel – Braunschweig/Stuttgart-Hohenheim	
21.	Selenium, antioxidant and immune status of milk from dairy cows fed different sources of dietary selenium	39
	Daniela Dinse, S. Salman, H. Schafft, Monika Lahrssen-Wiederholt, P. Annabella Khol-Parisini, Lydia Tedin and J. Zentek – Berlin	
22.	Effects of supplementing sodium chloride on acid-base balance and parameters of calcium metabolism of exercised horses	40
	Kristin Romanowski, Annette Zeyner, Ellen Kienzle, M. Füll and Pat Harris – Rostock/Munich/Leipzig/Waltham	
23.	Investigations on the best qualified sample (serum or plasma) for analysing copper and zinc supply in dairy cows	41
	Tatjana Tilker-Spreer, M. Spolders, M. Höltershinken, J. Rehage and G. Flachowsky – Braunschweig/Hannover	

24. **Bone development in early growth of chickens fed diets with different amounts of calcium and phosphorus** 42
Dorota Jamroz, R. Zylka and T. Wrotecki – Wrocław

Feed additives

25. **Dietary carnitine supplementation down-regulates components of the ubiquitin-proteasome system in liver and muscle of growing pigs** 43
Janine Keller, J. Varady, F. Hirche, H. Kluge, R. Ringseis and K. Eder – Gießen/Halle (Saale)
26. **Intestinal effects of a short term application of inulin with varying chain lengths in piglets** 44
Nadine Paßlack, W. Vahjen, K. Männer and J. Zentek – Berlin
27. **Effects of broccoli extract and various essential oils on the induction of phase II enzymes in the intestine of Ross 308 broilers** 45
Kristin Mueller, Anke Markert, Kathrin Sinningen, H. Kluge and A.S. Mueller – Halle (Saale)
28. **Multi-carbohydrase and phytase supplementation improves growth performance and liver insulin receptors sensitivity in chickens fed diets containing full-fat rapeseed** 46
D. Józefiak, S. Kaczmarek, A. Ptak, P. Maćkowiak and B. A. Slominski – Poznań/Winnipeg
29. **Cecal response of chickens fed diet with combined addition of carbohydrases and mannanoligosaccharides** 47
Agila Semaskaite, R. Gruzauskas, J. Juskievicius, Z. Zdunczyk, Virginija Jarule, Vilma Sasyte and Asta Raceviciute-Stupeliene – Kaunas/Olsztyn
30. **Fermentation processes in the caeca of chickens fed diets with combined addition of NSP-degrading enzymes and organic acids** 48
R. Gruzauskas, Agila Semaskaite, Virginija Jarule, Vilma Sasyte, Asta Raceviciute-Stupeliene, Z. Zdunczyk, J. Juskievicius and Monika Wróblewska – Kaunas/Olsztyn
31. **Effects of liquorice (*Glycyrrhiza glabra* L.) and crude fibre concentrate on growth and carcass composition of broiler chickens** 49
Ingrid Halle, U. Bauermann and R. Thomann – Braunschweig/Bergholz-Rehbrücke
32. **Effect of dietary supplementation with β -carotene, lutein and lycopene on the immune function of Japanese quails** 50
Ivett Jung, Cs. Szabó, Annamária Kerti and L. Bárdos – Gödöllő
33. **Effect of different vitamin D sources and levels on performance and mineral digestibility in grower-finisher pigs** 51
Anne-Kathrin Marion Witschi, S. Gebert, G.M. Weber and C. Wenk – Zürich
34. **Effects of rare earth elements (REE) on proliferation of bovine peripheral blood mononuclear cells (PBMC) after *in vitro* and *in vivo* exposure** 52
Lydia Renner, Annett Schwabe, Susanne Döll and S. Dänicke – Braunschweig

35. **Effect of a live yeast, *Saccharomyces cerevisiae* I-1077, used as a feed additive for ruminants, on *in situ* ruminal digestibility of alfalfa hay and fibre-associated microorganisms** 53
Frédérique Chaucheyras-Durand, Aurélie Ameilbonne, Pascale Mosoni and Evelynne Forano – Saint-Genès Champanelle/Blagnac

Energy metabolism

36. **The development of a ME-system for energy evaluation in horses** 54
Annette Zeyner, Christiane Schöler and Ellen Kienzle – Rostock/Munich
37. **Performance parameters of high-yielding dairy cows during early lactation, during an energy restriction at 100 DIM, and a following realimentation** 55
J. Groß, H. Anette van Dorland, R.M. Bruckmaier and F.J. Schwarz – Freising-Weihenstephan/Posieux/Bern
38. **Retinol-Binding-Protein 4 (RBP4) and abomasal displacement (DA)** 56
M. Füll, B. Füll, L. Locher and J. Raila – Leipzig/Potsdam
39. **First-pass splanchnic uptake of glucose in neonatal calves fed either colostrum or formula** 57
Julia Steinhoff, Solvig Görs, R. M. Bruckmaier, Ellen Kanitz, Helga Sauerwein, Cornelia C. Metges and H. M. Hammon – Dummerstorf/Bern/Bonn
40. **Energy metabolism in newborn calves during the first days of life measured by indirect calorimetry** 58
Julia Steinhoff, Inge Workel, M. Derno and H. M. Hammon – Dummerstorf
41. **Metabolic and endocrine profiles of cows grazed on pasture or fed grass indoors** 59
Luzia D. Kaufmann, A. Mürger, H. Anette van Dorland, R. M. Bruckmaier and Frigga Dohme – Posieux/Bern
42. **Behaviour of sheep grazing at different intensities in the Inner Mongolian steppe, China** 60
L. Lin, K. Müller and A. Susenbeth – Kiel

Digestion and gut microbiology

43. **The influence of body weight on digesta mean retention time in large herbivores** 61
P. Steuer, K.-H. Südekum, Ragna Franz, M. Clauss and J. Hummel – Bonn/Zürich
44. **Changes in the chemical composition of the microbial fraction, methane formation and short chain fatty acids by tannins and saponins using an *in vitro* rumen fermentation system** 62
J. Castro-Montoya, H. P. S. Makkar and K. Becker – Stuttgart-Hohenheim
45. **Influence of forage source and feed particle size of rations for ruminants on the ruminal *Archaea* and *Bacteroides-Prevotella* community *in vitro*** 63
M. Witzig, Jeannette Boguhn and M. Rodehutschord – Stuttgart-Hohenheim

46.	Effects of grain processing in a combined diet (consisting of supplementary feed and wheat or corn) for fattening turkeys and adding grit on the digestibility of organic matter and starch	64
	Stefanie Bank, L. Koddebusch and J. Kamphues – Hannover/Garrel	
47.	Increasing zinc oxide supplementation to piglets reveals effects on the concentration and diversity of small intestinal microbial communities	65
	W. Vahjen, R. Pieper and J. Zentek – Berlin	
48.	Quantitative changes in ileal and faecal microbiota and occurrence of <i>Escherichia coli</i> virulence factors in grower pigs fed diets supplemented with purified viscous and fermentable non-starch polysaccharides	66
	Barbara U. Metzler-Zebeli, Seema Hooda, R.T. Zijlstra, R. Mosenthin and M.G. Gänzle – Edmonton/Stuttgart-Hohenheim	
49.	Influence of NSP-hydrolyzing enzymes on nutrient digestibility and bacterial ecophysiology in an <i>in vitro</i> model of the porcine gastrointestinal tract	67
	R. Pieper, J. Bindelle, C.A. Montoya, A.G. Van Kessel and P. Leterme – Berlin/Saskatoon	
50.	<i>In vitro</i> growth and survival rate of the rumen protozoal species <i>Entodinium caudatum</i>, <i>Epidinium ecaudatum</i> and <i>Eudiplodinium maggii</i> in four different cultivation media	68
	Johanna O. Zeitz, L. Meile, T. Michałowski, M. Kreuzer and Carla R. Soliva – Zürich/Jablonna	
51.	Effect of freezing on fermentation activity and fermentation patterns of equine faeces as inoculum in the semi-continuous fermentation technique Caesitec	69
	Ann-Marie Müller, Diana Gall, Sabine Bremer, Kristin Romanowski and Annette Zeyner – Rostock	
52.	The use of natural <i>n</i>-alkanes as digestibility markers in sows	70
	M. Bulang, Emmrich T., Scheffler K., Kneisel S., H. Kluge and J. Broz – Halle (Saale)/Basel	
53.	The effect of three betaine sources on <i>in vitro</i> fermentation of different carbohydrate and protein combinations using faecal inocula from pigs	71
	Franziska Rink, Eva Bauer, Meike Eklund and R. Mosenthin – Stuttgart-Hohenheim	
54.	Content of nutrients and glucosinolates, nutrient digestibility and energy density of untreated and ethanolic treated rape seed meal in growing pigs	72
	Kirsten Buesing, W. Hackl, Antje Priepke, G. Fleck and Annette Zeyner – Rostock/Dummerstorf/Magdeburg	
55.	Effects of divercin on the gastrointestinal microflora and performance of broiler chickens	73
	D. Józefiak, S. Kaczmarek, A. Rutkowski, A. Sip and R. Gruel Engberg – Poznań/Aarhus	
56.	Impact of feather ingestion of laying hens on intestinal microbiota and microbial metabolites	74
	Beatrice Meyer, Alexandra Harlander-Matauschek, W. Vahjen and J. Zentek – Berlin/Stuttgart-Hohenheim	

57. **Caecal fermentation characteristics of growing turkeys fed diets with a different content of sunflower meal without or with the addition of carbohydrases** 75
J. Jankowski, J. Juskiewicz, Agata Lecewicz and Z. Zdunczyk – Olsztyn

Free topics

58. **Intrauterine crowding affects organ weight development and myogenesis in pigs** 76
J. Bérard, C. Pardo-Mariño, M. Kreuzer and G. Bee – Posieux/Zürich
59. **Faecal silica levels of large herbivores correlate to hypsodonty** 77
J. Hummel, Eva Findeisen, D. Codron, K.-H. Südekum and M. Clauss – Bonn/Zürich
60. **Microbial quality of drinking water in livestock farming (turkey fattening): basics and influences** 78
C. Visscher, U. Kümmel, R. Günther, U. Siesenop, M. Beyerbach und J. Kamphues – Hannover
61. **Relationship between average litter birth weight and intra-litter weight variability on organ weight development and myogenesis in pigs** 79
C. Pardo-Mariño, M. Kreuzer and G. Bee – Posieux/Zürich
62. **Ingestion of the flavonol quercetin decreases the bioavailability of the HMG-CoA reductase inhibitor simvastatin in pigs** 80
Silvia Wein, S. Wolffram, P. Langguth and R. Cermak – Kiel/Mainz/Leipzig
63. **Determination of B-vitamins in blood serum of dairy cows and evaluation of B-vitamin serum level changes throughout 24 h** 81
Wiebke Bigalke, Liane Hüther, M. Spolders, S. Dänicke and G. Flachowsky – Braunschweig
64. **Development of a liquid-chromatography-tandem mass spectrometry (LC-MS/MS) method for analysis of very low stable isotope enrichments (0.01 – 0.5 MPE) of [²H₃]-phenylalanine in physiological samples** 82
Katrin Wilkerling, Hana Valenta and S. Dänicke – Braunschweig

Lipids and fatty acids

65. **Rumen-protected choline reduces hepatic triacylglycerol concentrations in periparturient dairy cattle** 83
A.M. van Vuuren, R. Zom, Roselinde M.A. Goselink, J.A. Bakker and M.J. de Veth – Lelystad/New Hampton
66. **Effects of long-term supplementation of dairy cow rations with rumen-protected conjugated linoleic acids (CLA) on fatty acid distribution in milk fat** 84
Julia Pappritz, U. Meyer, G. Jahreis, G. Flachowsky and S. Dänicke – Braunschweig/Jena

67.	Immunohistochemical localisation of 11βHSD1 in adipose tissue of dairy cattle supplemented with conjugated linoleic acids Susanne Häußler, Claudia Strafella, S. Dänicke, D. von Soosten and Helga Sauerwein – Bonn/Braunschweig	85
68.	<i>In vitro</i> biohydrogenation of various oilseeds A. Hoffmann, H. Steingäß, Karin Hartung and R. Mosenthin – Stuttgart-Hohenheim	86
69.	Effect of synthetic and native PPARα agonists on expression of genes involved in carnitine homeostasis and tissue and egg carnitine concentrations in laying hens R. Ringseis, M. Shibani, Janine Keller, F. Hirche, H. Kluge, B. König, G.I. Stangl and K. Eder – Gießen/Halle (Saale)	87
70.	Effect of rumen-protected conjugated linoleic acids (CLA) on adipose depot distribution and liver weight of dairy cows D. von Soosten, U. Meyer, G. Flachowsky and S. Dänicke – Braunschweig	88
71.	Supplementation effects of rumen protected conjugated linoleic acids on fatty acid distribution of liver and adipose tissue in dairy cows during lactation R. Kramer, S. Dänicke and G. Jahreis – Jena/Braunschweig	89
72.	Investigations with dairy cows on effects of calcium salts of fatty acids or prilled fat on milk yield and milk composition with emphasis on <i>trans</i>-fatty acids Antje Reicheltanz, B. Pieper, M. Gabel and Annette Zeyner – Rostock/Wuthenow	90
73.	A response of colostrum and milk conjugated linoleic acid isomers profiles to different protein levels in goat diets M. Czauderna, J. Kowalczyk, J.P. Michalski and K.A. Krajewska – Jabłonna	91
74.	The effect of <i>Camelina sativa</i> supplementation to dairy ewes on milk fatty acid composition Malgorzata Szumacher-Strabel, A. Cieslak, P. Zmora, Emilia Pers-Kamczyc, Sylwia Bielinska, M. Staniszc and J. Wojtowski – Poznan	92
75.	Effect of different pastures or indoor feeding on fatty acid composition of beef Gloria Schlegel, M. Schuster and F.J. Schwarz – Freising-Weihenstephan/Grub	93
76.	The effect of genetic selection and dietary polyunsaturated fatty acids on Fatty Acid Synthase (FAS) and Peroxisome Proliferator Activating Receptor γ (PPARγ) expression in abdominal adipose tissue of mice H. Bergmann, Karin Nürnberg, D. Dannenberger and Korinna Huber – Hannover/Dummerstorf	94
77.	Hyperlipidemia in Marmoset Monkeys is accompanied by symptoms of metabolic syndrome Christina Schlumbohm, F. Liebert, Anna Mitura and E. Fuchs – Göttingen	95
78.	A new internal standard for improved monitoring of the efficiency of liquid chromatographic analysis of fatty acids containing conjugated double bonds in biological samples M. Czauderna, J. Kowalczyk, J.P. Michalski, K.A. Krajewska and A.J. Rozbicka-Wieczorek – Jabłonna	96

Effects on environment

79.	N excretion to N deposition ratios in growing pigs as derived from modelling of N excretion depending on dietary protein supply C. Wecke and F. Liebert – Göttingen	97
80.	<i>In vitro</i> evaluation of various feeds and feed additives for their methane suppressing activity and their effects on ruminal fermentation Sabrina M. Staerfl, M. Kreuzer and Carla R. Soliva – Zürich	98
81.	Efficiency of several combinations of potential inhibitors of ruminal methane formation <i>in vitro</i> Sonja Westphal, H. Steingäß, W. Drochner and M. Rodehutschord – Stuttgart-Hohenheim	99
82.	The use of principal component analysis to screen tropical plants for high quality and low ruminal methane formation A. Jayanegara, Carla R. Soliva, Elizabeth Wina, Svenja Marquardt, M. Kreuzer and F. Leiber – Zürich/Bogor	100
83.	The influence of dietary crude protein level on growth performance, carcass quality and N-excretion of fattening pigs (PLW x PL) x (Ha x Pi). M. Kasprowicz-Potocka and A. Frankiewicz – Poznan	101
84.	Ruminal methane abatement study testing several, naturally occurring substances of different origin <i>in vitro</i> Carla R. Soliva, S. L. Amelchanka, S. Duval and M. Kreuzer – Zürich/Kaiseraugst	102
85.	Screening of potential inhibitors of methanogenesis using the Hohenheim Gas Test G. Wischer, Jeannette Boguhn, H. Steingäß and M. Rodehutschord – Stuttgart-Hohenheim	103
86.	Rumen methanogens population response to linolenic acids <i>in vitro</i> A. Cieslak, P. Zmora, Emilia Pers-Kamczyc, Barbara Nowak and Malgorzata Szumacher-Strabel – Poznan	104

Feedstuff evaluation and feeding

87.	A practical model to estimate the requirements for physically effective fibre (peNDF) in dairy cows Q. Zebeli, D. Mansmann, B. N. Ametaj, H. Steingäß and W. Drochner – Edmonton/Stuttgart-Hohenheim	105
88.	Diet change from grain maize-supplemented grazing to pure grazing: Elution kinetics of maize-derived ¹³C in faeces and milk S. Schneider, K. Auerswald, H. Schnyder and G. Bellof – Freising	106
89.	Energy intake and weight development of grazing goats in the Al Jabal al Akhdar Mountains of Oman U. Dickhoefer and Eva Schlecht – Witzenhausen	107
90.	Assessing silage quality on laboratory scale – a comparison between glass jar silages and vacuum-packed Rostock model silages (ROMOS) Sandra Hoedtke, Edda Maria Ott and Annette Zeyner – Rostock	108

91.	Effects of grinding intensity and botanical composition of unpelleted diets for fattening pigs on the integrity of the gastric mucosa Saara Betscher, M. Wintermann, Denise Pohl, Anne Mößeler, B. Bodmann, Christiane Schulze Langenhorst, G. Stalljohann and J. Kamphues – Hannover/Bad Sassendorf	109
92.	Prediction of organic matter digestibility of pigs' diets from faeces using near-infrared reflectance spectroscopy Anne Schiborra, Britta Blank, O.S. Akinola, M. Bulang and Eva Schlecht – Kassel-Witzenhausen/Göttingen/Kiel/Abeokuta/Halle (Saale)	110
93.	Growth performance and metabolic efficiency of common carp (<i>Cyprinus carpio</i> L.) fed detoxified <i>Jatropha curcas</i> kernel meal V. Kumar, H. P. S. Makkar and K. Becker – Stuttgart-Hohenheim	111
94.	Aggregation of German livestock production according to a revised evaluation of cereal units S. Schulze Mönking and Hj. Abel – Göttingen	112
95.	Barley grain-based diets processed with lactic acid modulated plasma metabolites and mediators of innate immunity in dairy cows Q. Zebeli, Summera Iqbal, A. Mazzolari, Suzanna M. Dunn and B. N. Ametaj – Edmonton	113
96.	Periparturient metabolism, health and fertility in SB dairy cows with different milk yields F. Heckel and M. Fürll – Leipzig	114
97.	Quality and suitability of buckwheat and chicory silage as a forage for dairy cows Tasja Kälber, M. Kreuzer and F. Leiber – Zürich	115
98.	Significance of trees and shrubs in the diet of cattle and goats pasturing in the surroundings of the Bandhavgarh National Park, India Jana L. Müller, P.L. Saklani, M.M. Babu, M.K. Tripathi, Andrea C. Mayer, M. Kreuzer and Svenja Marquardt – Zürich/Dehradun/Avikanagar	116
99.	Effect of the concentration of condensed tannins in different sainfoin accessions grown at three sites on <i>in situ</i> ruminal degradation kinetics of dry matter and crude protein R.B.N. Azuhnw, B. Thomann, Y. Arrigo, B. Boller, H.D. Hess, M. Kreuzer and Frigga Dohme – Posieux/Zürich	117
100.	Effect of supplementing maize silage with urea on characteristics of fermentation <i>in vitro</i> B. Hildebrand, Jeannette Boguhn and M. Rodehutsord – Stuttgart	118
101.	Comparison of the ruminal degradability of different components of the maize plant Abdallah Metwally and F.J. Schwarz – Freising-Weihenstephan	119
102.	The effect of berry seeds after CO₂ extraction in supercritical conditions on rumen metabolic responses <i>in vitro</i> P. Zmorá, A. Cieslak, E. Rój, Emilia Pers-Kamczyc, M. Pyrski, M. Hejdys and Małgorzata Szumacher-Strabel – Poznań	120
103.	Effect of diet C/N and NDF/soluble carbohydrate ratio on dung composition in <i>Bubalus bubalis</i> H. al Asfoor, Anne Schiborra, A. Sundrum and Eva Schlecht – Kassel-Witzenhausen	121

104.	Effect of free air carbon dioxide enrichment (FACE) and water stress during cultivation on the <i>in sacco</i> degradability of ensiled maize harvested at various times	122
	M. Lohölter, U. Meyer, P. Lebzien, R. Manderscheid, H.-J. Weigel, G. Pahlow, G. Flachowsky and S. Dänicke – Braunschweig	
105.	Electromyographic evaluation of masseter muscle activity in horses fed with different types of roughages	123
	Ingrid Vervuert, Nathalie Brüssow, Mandy Bochnia, Teresa Hollands, D. Cuddeford and M. Coenen – Leipzig/Hannover/Ringstead	
106.	Nutrient digestibility in a diet of young stallions, as established under field conditions with the internal marker acid insoluble ash (AIA)	124
	D. Kosłowski and F. Liebert – Göttingen	
107.	Cassava byproduct utilization in growing pigs: Effects of enzyme addition and fermentation	125
	O.S. Akinola, A.O. Fanimo, J.A. Agunbiade, A. Susenbeth and Eva Schlecht – Abeokuta/Kiel/Kassel-Witzenhausen	
108.	Application of spray dried porcine blood products and bone protein in laying hens feeding	126
	J. Orda, Dorota Jamroz, A. Wiliczekiewicz and Jolanta Skorupińska – Wrocław	
109.	Effect of lignin as a feed additive on performance, organ weights and NH_3-formation in a broiler study	127
	Janina S. Meier, B. Bucher and C. Wenk – Zürich	
110.	Zootechnical performance and carcass characteristics of broiler chicks fed distillers dried grain with solubles (DDGS)	128
	K. Schedle, Vera Guggenberger, R. Leitgeb and W. Windisch – Wien	
111.	Basic data for factorial derivation of energy and nutrient requirements for egg production in psittacines and passeriformes	129
	Anna Loesgen, Annett-C. Häbich and J. Kamphues – Hannover	
112.	Effects of high dietary level of soybean meal on development and severity of foot pad dermatitis (FPD) in growing turkeys housed on dry and wet litter	130
	I.M.I. Youssef, A. Beineke and J. Kamphues – Hannover	
113.	Effect of corn endosperm hardness, drying temperature and microbial phytase and xylanase supplementation on the performance of broiler chickens	131
	S. Kaczmarek, D. Józefiak, A. Rutkowski and A. Cowieson – Poznań/Marlborough	
114.	Nutritional and physiological evaluation of the dietary inclusion of <i>Jatropha platyphylla</i> Müll. Arg. kernel meal in Nile Tilapia (<i>Oreochromis niloticus</i> L.)	132
	O. Oyeleye, V. Kumar, H. P. S. Makkar, A. Akinleye, M.A. Angulo-Escalante and K. Becker – Stuttgart-Hohenheim/Sinaloa	
115.	Effect of grinding intensity (coarse/fine) and diets' physical form (mash/pellets) on buffering capacity and further parameters of gastric ingesta at the pars nonglandularis in young pigs	133
	Anne Mößeler, M. Wintermann, Sylvia Köttendorf, Saara Betscher, Stefanie Hansen, Linda Öhlschläger and J. Kamphues – Hannover	

116.	Investigations on dietary influences on pH-values in the urine of dwarf rabbits	134
	Christina Paulus, Petra Wolf and J. Kamphues – Hannover	
117.	Gamma-oryzanol (a naturally occurring compound of rice oil) – an anabolic substance? Studies in growing fattening rabbits (regarding body composition) and horses (serum testosterone level)	135
	Silke Licht, Anne Mößeler, L. Wilhelm and J. Kamphues – Hannover/Geesthacht	
118.	Effects of varying levels of lipid and starch on growth performance and body composition in juvenile burbot (<i>Lota lota</i> L.)	136
	H. Woher, A. Harsányi and F.J. Schwarz – Lindbergmühle/Freising-Weihenstephan	
119.	First steps in development of a complete laboratory diet for common marmoset monkeys	137
	Anna Mitura, F. Liebert, Christina Schlumbohm and E. Fuchs – Göttingen	
120.	Changes in pelleted feed acceptance due to flavouring a complete laboratory diet for the common marmoset monkey	138
	Anna Mitura, F. Liebert, Christina Schlumbohm and E. Fuchs – Göttingen	

Transport and epithelial physiology

121.	Intestinal glucose transport in lactating dairy cows with different extent of fat mobilisation	139
	Stefanie Klinger, H. Martens and G. Breves – Hannover/Berlin	
122.	Inhibition of ruminal urea transport by ammonia depends on luminal pH and SCFA concentrations	140
	Z. Lu, K. Abdoun, F. Stumpff and H. Martens – Nanjing/Khartoum/Berlin	
123.	Effect of diets' physical form (meal, pellets), type of feeding (liquid, dry) and exposure to hydrochloric acid on functional parameters of the pig stomach	141
	Sabine Leonhard-Marek, M. Wintermann, Saara Betscher, Anne Mößeler and J. Kamphues – Hannover	
124.	Uptake of the colon carcinogen 2-amino-1-methyl-6-phenylimidazo[4,5-b]pyridine by different segments of the rat gastrointestinal tract	142
	P. Steinberg, Petra Nicken, G. Hamscher and G. Breves – Hannover	
125.	Isolated ruminal epithelial cells of the sheep express a channel permeable to the anions of SCFA	143
	M. I. Georgi, F. Stumpff and H. Martens – Berlin	
126.	<i>In vitro</i> effects of zinc sulfate on epithelial properties of intestinal cells: influence of culture conditions and application side	144
	Ulrike Lodemann, Angelika Bondzio, R. Einspanier and H. Martens – Berlin	
127.	Pathways and regulation of gastrointestinal potassium (K) transport in ruminants	145
	Nina Kronshage and Sabine Leonhard-Marek – Hannover	

128. **Effects of colostrum versus formula feeding on mucosal growth, glucose transporter and lactase in the small intestine of neonatal calves** 146
Julia Steinhoff, R. Zitnan, Ulrike Schönhusen and H. M. Hammon –
Dummerstorf/Kosice

Undesirable substances

129. **A survey on *Fusarium* toxins and Ochratoxin A in cereal straw from Germany** 147
S. Sondermann, M. Schollenberger, W. Drochner, D. Rohweder, Hana Valenta, S. Dänicke, Karin Hartung and H.-P. Piepho – Stuttgart-Hohenheim/Braunschweig
130. **Residues of dioxins in adipose tissue of pigs depending on contamination in feed** 148
U. Wehr, S. Lenk, K.W. Schramm, R. Mayer and Sylvia von Rosenberg – Oberschleissheim/Munich
131. **Effects of deoxynivalenol (DON) and related compounds on bovine peripheral blood mononuclear cells (PBMC)** 149
S. Dänicke, Christina Keese and Tanja Goyarts – Braunschweig
132. **Investigations on adverse effects of feeding dried marsh horsetail (*Equisetum palustre*) to ruminants and horses** 150
Katharina Hünsche, Petra Wolf, G. Lange and J. Kamphues – Hannover
133. **No indication for a transplacental transfer of deoxynivalenol (DON) or its metabolite de-epoxy-DON in dairy cows** 151
Susanne Döll, Lydia Renner, U. Meyer, Hana Valenta and S. Dänicke – Braunschweig
134. **Altered gene expression in the liver of broilers fed naturally Deoxynivalenol-contaminated wheat** 152
B. Dietrich, B. Bucher and C. Wenk – Zürich
135. **Effect of ensilage on canavanine reduction in soaked grains of *Canavalia ensiformis* sole or mixed with *Sorghum bicolor*** 153
L.A. González Díaz, Sandra Hoedtke, A. Castro Alegría and Annette Zeyner – Rostock

Workshop: Evaluation of the adequacy of feeding and metabolic status of dairy cows on the basis of concentrations in blood and other media: Chances, limitations and challenges

W1.	Goals and intentions of the workshop	157
	J. Kamphues – Hannover	
W2.	Bloodtests – When and what for from the farmers point of view?	160
	T. Engelhard – Iden	
W3.	Impacts of preanalytical variables on the quality of laboratory test results in farm animal examination	162
	Esther Humann-Ziehank – Hannover	
W4.	Variables, control elements, feedback: the basics for the interpretation of blood parameters	165
	M. Kaske – Hannover	
W5.	How to make the outcome of milk analyses better with further data from the control of feeding	167
	B. Losand – Dummerstorf	
W6.	Can we estimate the energy - and protein supply of dairy cows parameters in the blood and/or milk?	169
	M. Stangassinger - München	
W7.	Can pooled samples reduce the cost for evaluating the metabolic profile in dairy herds?	173
	R. Staufenbiel - Berlin	
W8.	Macro and trace element contents in blood of dairy cows after different supply	174
	M. Spolders, R. Staufenbiel, A. Müller, G. Flachowsky - Braunschweig/Berlin/Ludwigsburg	
W9.	Blood examination: Not how much – but the aim – is important	178
	M. Höltershinken – Hannover
