|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>ABBREVIATIONS.....</b>                                                                                                                                                                 | <b>- 1 -</b>  |
| <b>1 GLIOMA GENOMICS AND MOLECULAR CLASSIFICATION.....</b>                                                                                                                                | <b>- 3 -</b>  |
| <b>1.1 Introduction.....</b>                                                                                                                                                              | <b>- 3 -</b>  |
| 1.1.1 Histological classification of gliomas.....                                                                                                                                         | - 3 -         |
| 1.1.2 Molecular markers in gliomas .....                                                                                                                                                  | - 5 -         |
| 1.1.3 Next-generation analysis of gliomas.....                                                                                                                                            | - 6 -         |
| <b>1.2 Materials &amp; Methods.....</b>                                                                                                                                                   | <b>- 9 -</b>  |
| 1.2.1 Study cohorts .....                                                                                                                                                                 | - 9 -         |
| 1.2.2 Molecular marker testing .....                                                                                                                                                      | - 10 -        |
| 1.2.3 Illumina 450k methylation array .....                                                                                                                                               | - 11 -        |
| 1.2.4 Functional RNA expression analysis.....                                                                                                                                             | - 13 -        |
| <b>1.3 Results.....</b>                                                                                                                                                                   | <b>- 14 -</b> |
| 1.3.1 ATRX loss refines the classification of anaplastic gliomas and identifies a subgroup of <i>IDH</i> mutant astrocytic tumors with better prognosis .....                             | - 14 -        |
| 1.3.2 Integrated DNA methylation and copy-number profiling identify three clinically and biologically relevant groups of anaplastic glioma .....                                          | - 16 -        |
| 1.3.3 Brain tumor cells interconnect to a functional and resistant network .....                                                                                                          | - 19 -        |
| <b>2 RADIOGENOMICS – VISUALIZING THE GENOTYPE .....</b>                                                                                                                                   | <b>- 21 -</b> |
| <b>2.1 Introduction.....</b>                                                                                                                                                              | <b>- 21 -</b> |
| 2.1.1 Advanced MR imaging sequences.....                                                                                                                                                  | - 21 -        |
| 2.1.2 Machine learning techniques.....                                                                                                                                                    | - 24 -        |
| <b>2.2 Materials &amp; Methods.....</b>                                                                                                                                                   | <b>- 27 -</b> |
| 2.2.1 Patients & imaging data .....                                                                                                                                                       | - 27 -        |
| 2.2.2 Quantitative image description .....                                                                                                                                                | - 28 -        |
| 2.2.3 Molecular data .....                                                                                                                                                                | - 29 -        |
| 2.2.4 Machine learning analysis .....                                                                                                                                                     | - 30 -        |
| <b>2.3 Results.....</b>                                                                                                                                                                   | <b>- 31 -</b> |
| 2.3.1 Multiparametric MRI-based differentiation of WHO grade II / III glioma and WHO grade IV glioblastoma.....                                                                           | - 31 -        |
| 2.3.2 <i>IDH</i> mutation status is associated with a distinct hypoxia / angiogenesis transcriptome signature which is non-invasively predictable with rCBV imaging in human glioma ..... | - 33 -        |
| 2.3.3 Diffusion tensor image features predict <i>IDH</i> genotype in newly diagnosed WHO grade II / III gliomas .....                                                                     | - 36 -        |

|                                                           |               |
|-----------------------------------------------------------|---------------|
| <b>3 DISCUSSION .....</b>                                 | <b>- 38 -</b> |
| 3.1 Towards a molecular classification of gliomas .....   | - 38 -        |
| 3.2 Detecting the genotype in the imaging phenotype ..... | - 41 -        |
| <b>4 SUMMARY .....</b>                                    | <b>- 43 -</b> |
| <b>5 REFERENCES.....</b>                                  | <b>- 44 -</b> |
| <b>6 CURRICULUM VITAE .....</b>                           | <b>- 50 -</b> |
| <b>7 ACKNOWLEDGEMENTS.....</b>                            | <b>- 51 -</b> |
| <b>8 PUBLICATIONS PRESENTED IN THIS THESIS.....</b>       | <b>- 52 -</b> |
| <b>9 BIBLIOGRAPHY .....</b>                               | <b>- 53 -</b> |
