List of Contributors	xv
1 Interleukin-1 in the Acute Phase Response	
<i>J. Gauldie</i>	
Introduction	1
The Acute Phase Response	2
Structure of IL-1	2
Synthesis and Regulation of IL-1	3
IL-1 Receptor	3
Pleotropic Actions of IL-1	4
IL-1 and Acute Phase Reactions	6
Fever	6
Leukocytosis	7
Acute Phase Proteins	7
IL-1 and Other Cytokines	11
Synergy of Action	11
Induction of Other Cytokines by IL-1	11
IL-1 and Corticosteroid	12
In Vivo Action of IL-1	13
Summary	14
2 Regulation of Human SAA Gene Expression by Cytokines	
<i>M. R. Edbrooke and Patricia Woo</i>	
Introduction	21
In Vitro Expression of Human SAA	21
Cis-acting Sequences Responsible for PMA Induction of SAA	22
Cytokine Control of SAA Expression	23
3 Transcriptional Regulation of Acute Phase Response Genes with Emphasis on the Human C-reactive Protein Gene	
<i>G. Ciliberto</i>	
Introduction	29
The Physiological Role of the Acute Phase Response	30
Systems for the Study of the Acute Phase Response	31

Monokines Responsible for the Modulation of Liver-specific Gene Expression	32
Transcriptional Regulation – the Mechanism	35
Liver-specific Promoters and Enhancers	35
Promoters Induced During the Acute Phase	37
Conclusions and Perspectives	42
 4 Organization, Structure and Expression of Pentraxin Genes	
<i>A. S. Whitehead</i>	
Introduction	47
The Structure of Pentraxin Proteins	48
The Structure of Pentraxin Genes	51
Heat Shock Elements	52
The Purine–Pyrimidine Repeat Region and Oligo-A Stretch in the CRP Intron	53
The 3' Untranslated Region	53
Elements Responding to Cytokines	54
Genetics	54
 5 ApoSSA: Structure, Tissue Expression and Possible Functions	
<i>E. P. Benditt, R. L. Meek and N. Eriksen</i>	
Introduction	59
Background	59
SAA is an Apolipoprotein	60
Where are SAAs Made and Where do They go?	61
Patterns of Cell and Tissue Expression of SAA mRNAs in Mice	62
Rats Have SAA-related Genes	63
Summary	64
 6 Regulation of Biosynthesis and Secretion of Human C-reactive Protein and Serum Amyloid A	
<i>I. Kushner, M. K. Ganapathi and S. S. Macintyre</i>	
Introduction	69
Regulation of Biosynthesis	71
Role of Cytokines	71
Role of Cofactors: Signal Transduction	75
Heterogeneity in the Acute Phase Response	77
Regulation of CRP Secretion	77
Dynamics of CRP Secretion by Rabbit Hepatocytes	78
Subcellular Localization of the Intracellular Pool of CRP	79
CRP is Specifically Retained Within the Endoplasmic Reticulum	80
Conclusions	81

7 Molecular Regulation of the Acute Phase Complement Proteins	
<i>H. R. Colten and J. D. Gitlin</i>	
Introduction	85
Factor B	87
The Second Component, C2	89
Constitutive Expression of Factor B and C2	89
Regulated Gene Expression	90
Interleukin-1 and Interferon- γ	90
Tumor Necrosis Factor and Interleukin-6	93
Summary	93
 8 Biosynthesis of Acute Phase Proteins by the Liver Cells	
<i>G. Feldmann, D. Bernuau, J. Y. Scoazec and M. Maurice</i>	
Introduction	97
Role of Hepatocytes in the In Vivo Biosynthesis of APR	98
Expression of APR in the Normal Unstimulated Liver	98
Expression of APR During the AIR	101
Role of Sinusoidal Cells in the In Vivo Biosynthesis of APR	103
Summary	103
 9 The Plasma Serine Protease Inhibitors (Serpins): Structural Modifications in Inflammation	
<i>P. E. Stein and R. W. Carrell</i>	
The Serpins	107
Structure of the Serpins	107
Synthesis of Serpins in Inflammation	109
Antitrypsin	111
Antitrypsin Deficiency	111
The Reactive Centre	112
Mechanism of Protease Inhibition	112
Specificity of Inhibition	112
Reactive Centre Oxidation of Antitrypsin	113
The SR Conformational Change	114
Physiological Significance of the SR Change	115
Pathological Significance of the SR Change	116
Evolutionary Loss of the SR Change	118
Other Structural Modifications in Inflammation	118
N-terminal Cleavage: Angiotensinogen	118
Modification of Carbohydrate	119
Conclusions	119

10	The Three Dimensional Structure of SAP <i>H. E. White, B. P. O'Hara, G. Oliva, T. L. Blundell</i> <i>M. B. Pepys and S. P. Wood</i>	123
11	Structure, Metabolism and Function of Acute Phase High Density Lipoprotein <i>F. C. de Beer, A. F. Strachan and E. G. Shephard</i> Introduction	137
	Apo-SAA in Plasma	138
	Structure of Apo-SAA	138
	Structure of Acute Phase HDL	140
	Metabolic Function of Normal HDL	142
	Synthesis of Apo-SAA	143
	Plasma Clearance of Apo-SAA	144
	Cellular Association and Degradation of Apo-SAA ..	145
	Functions of Apo-SAA	147
	Concluding Remarks	148
12	Clinical Measurement of Acute Phase Proteins to Detect and Monitor Infectious Diseases <i>P. E. Laurent</i> Introduction	151
	Microbial Growth and AP Protein Response	152
	General Pattern of AP Protein Response in Infection	154
	Monitoring Disease Activity Using AP Protein Response	155
	AP Protein Response in Viral Infection	155
	Immunomodulation and AP Protein Response	156
13	C-reactive Protein: Clinical Aspects <i>M. H. van Rijswijk and M. A. van Leeuwen</i> Introduction	161
	The Acute Phase Proteins	161
	The Erythrocyte Sedimentation Rate as an Indirect Indicator for the Acute Phase Reaction	162
	C-reactive Protein as a Direct Indicator of the Acute Phase Reaction	163
	Assays for CRP	163
	CRP Levels in Different Diseases	163
	Functions of CRP	165
	Conclusion	166
14	Pathogenesis of AA Amyloidosis <i>G. Husby</i> Definition and Classification of Amyloidosis	169
	Serum and Tissue Amyloid A Proteins	171
	Structure of SAA and AA	171
	Induction and Production of the Acute Phase Protein SAA	172

Apo SAA and "Apo AA"	175
Displacement of SAA from HDL-SAA Complexes by Apo AI and Apo AII	176
Formation and Deposition of AA Amyloid	177
Incomplete Degradation of SAA	178
Amyloid Enhancing Factor and Glycosaminoglycans	178
Protein AP: The Amyloid "P Component"	179
Summary of Some Current Hypotheses Regarding AA Amyloid Formation	180
15 Serum Amyloid P Component: A Specific Molecular Targeting Vehicle in Amyloidosis <i>P. N. Hawkins and M. B. Pepys</i>	
Introduction	187
Serum Amyloid P Component	188
Ligand Binding by SAP/AP	188
Binding of SAP to Chromatin	189
SAP and Amyloidosis	190
Tissue Amyloid P Component	191
SAP as a Targeting Vehicle in Amyloidosis	191
Scintigraphic Imaging of Amyloid Deposits In Vivo .	191
Radiolabelled-SAP Studies in Experimental Murine Amyloidosis	192
Mouse Imaging Studies Using ^{123}I -Human SAP	192
Mouse Imaging Studies Using ^{123}I -Mouse SAP	195
Localization of ^{125}I -Pentraxins in AEF-Induced Amyloid	196
^{125}I -SAP Localization as a Method of Quantitating Murine Amyloid Deposits	197
Radiolabelled SAP Studies in Man	198
Preparation of ^{123}I -Human SAP for Clinical Studies	198
Imaging of Human Amyloid Deposits	199
Human SAP Turnover Studies	199
Conclusions	203
Subject Index	207
