

I.	INTRODUCTION	1
II.	SITES, CLIMATE, AND WEATHER	
1.	Location and soil types	5
2.	Meteorological data	8
3.	Greenhouse	10
III.	MATERIAL AND METHODS	
1.	Land cultivation	11
2.	Sowing	11
3.	Fertilizers	12
4.	Plant protection and weeding	12
5.	Shoot sampling	13
6.	Harvest	14
7.	Nitrogen fixation	14
8.	Nitrate reductase activity	15
9.	Root sampling	15
10.	Mycorrhiza	16
11.	Soil water measurements	16
12.	Soil analysis	17
13.	Plant analysis	18
14.	Fertilizer response and phosphate utilization	19
15.	Statistics	19
IV.	EFFECTS OF PHOSPHATE FERTILIZATION ON PHOSPHATE UPTAKE AND GROWTH OF GRAIN LEGUMES AND BARLEY AT TWO LOCATIONS IN A SEASON WITH LOW RAINFALL (1983/84)	
	Abstract	21
	Introduction	22
	Material and methods	23
	Results	
	Shoot growth and yield	25
	Yield formation	29
	Seed yield in relation to growth of young plants	30
	Phosphate uptake and fertilizer use	32
	Other nutrients	36
	Root growth and mycorrhiza	38
	Nitrogen fixation and nitrate reductase activity	38
	Plant water use	38
	Discussion	
	Environmental constraints to plant growth	43
	Phosphate fertilizer use and phosphate limitations to plant growth	51
	Phosphate efficiency	54
	Water use	59

V. EFFECTS OF PHOSPHATE FERTILIZATION ON PHOSPHATE UPTAKE AND GROWTH OF GRAIN LEGUMES AND BARLEY AT TWO LOCATIONS IN A SEASON WITH MODERATE RAINFALL (1984/85)

Abstract	62
Introduction	63
Material and methods	64
Results	
Shoot growth and yield	65
Yield formation	70
Seed yield in relation to growth of young plants	70
Phosphate uptake and fertilizer use	73
Other nutrients	83
Root growth and mycorrhiza	91
Nitrogen fixation	93
Soil water	94
Discussion	
Soil nutrient supply and plant growth	99
Critical phosphate concentration in plant tissue	107
Crop species differences in climatic adaption	115
Plant water use and fertilizer phosphate	118
Phosphate efficiency of legumes and barley	124
Improvement of phosphate efficiency in legumes	128

VI. EFFECTS OF DEEP PLACEMENT OF PHOSPHATE FERTILIZER ON PHOSPHATE UPTAKE AND GROWTH OF GRAIN LEGUMES AND BARLEY

Abstract	130
Introduction	130
Material and methods	131
Results	132
Discussion	135

VII. EFFECTS OF FOLIAR PHOSPHATE APPLICATION ON PHOSPHATE UPTAKE AND GROWTH OF FABA BEAN AND LENTIL

Abstract	138
Introduction	138
Material and methods	139
Results	140
Discussion	142

VIII. EFFECTS OF PHOSPHATE FERTILIZATION ON MYCORRHIZAL COLONIZATION OF LENTIL

Abstract	145
Introduction	145
Material and methods	147

Results	147
Discussion	150
IX. MYCORRHIZAL COLONIZATION OF CHICKPEA AND LENTIL IN ON-FARM EXPERIMENTS	
Abstract	154
Introduction	154
Material and methods	155
Results	157
Discussion	160
X. RESIDUAL EFFECTS OF PHOSPHATE FERTILIZATION TO A BARE FALLOW, LENTIL OR BARLEY ON MYCORRHIZAL COLONIZATION, PHOSPHATE UPTAKE, AND GROWTH OF A SUBSEQUENT BARLEY CROP	
Abstract	165
Introduction	165
Material and methods	168
Results	170
Discussion	174
XI. EFFECTS OF PHOSPHATE FERTILIZATION AND VESICULAR-ARBUSCULAR MYCORRHIZAL FUNGI ON NUTRIENT UPTAKE OF POT-GROWN CHICKPEA	
Abstract	178
Introduction	178
Material and methods	180
Results	182
Discussion	190
XII. GENERAL DISCUSSION	
Plant growth response to phosphate fertilization	196
Critical phosphate concentrations in plant tissue	199
Water use and phosphate fertilization	202
Phosphate efficiency of grain legumes and barley	204
XIII. CONCLUSIONS	209
XIV. SUMMARY	211
XV. ZUSAMMENFASSUNG	214
XVI. REFERENCES	218
ACKNOWLEDGEMENTS
