Dordrecht / Boston / London

Published in cooperation with NATO Scientific Affairs Division

TABLE OF CONTENTS

Preface	vii
----------------------	-----

Contributors	ix
---------------------------	----

Part I. Organic Pollutants and Bioremediation

Persistent Organic Contaminants in the Environment: PAHs as a Case Study	3
--	---

B. Maliszewska-Kordybach

Evaluation of Contamination Level of Dnieper River Basin by Organic and Inorganic Toxicants.....	35
--	----

V.V. Goncharuk and M. V. Milyukin

Underground Pollution at a Former Military Installation in Valciunai (Lithuania).....	57
---	----

N. Šeyris and A. Marcinonis

Application of a Biodegradation-Redox Model for Predicting Bioremediation Performance *	73
---	----

G.R. Carey, P.J. Van Geel, E.A. McBean and F.A. Rovers

Bioremediation of Environments Contaminated with Organic Xenobiotics: Putting Microbial Metabolism to Work: What happens with the Contaminant once it has reached the Cell Surface?.....	79
--	----

A.J.B. Zehnder

Factors Controlling the Biodegradation of Chemicals in Soils	93
--	----

S. Fass, H. Vaudrey, T.M. Vogel, and J.-C. Block

Part II. Assessment of Bioavailability

The Use of Laboratory Model Systems to Elucidate the Mechanisms of Bioavailability of Hydrophobic Organic Compounds	121
---	-----

H. Harms

Pollutant Aging Studies in Soils. Relevancy of Bench Scale Assessments to Field Conditions *	135
--	-----

E.A. Guthrie

Factors Affecting the Evaluation of Long-Term PCB Biodegradation in Soils by White Rot Fungi *	141
--	-----

A. Kubátová and P. Erbanová

Quantifying the Intrinsic Bioremediation Potential and the Hazard Index of Organic Xenobiotics in Aquifers Based on their Bioavailability Rates *	147
---	-----

Y. Dudal, L. Deschênes and R. Samson

* Initially given at the Institute as a short volunteered presentation

The Use of Whole-Cell Living Biosensors to Determine the Bioavailability of Pollutants to Microorganisms *	153
<i>M.C.M. Jaspers, S. Totevova, K. Demnerova, H. Harms and J.R. Vand Der Meer</i>	
Abiotic Transformations of Organic Xenobiotics in Soils: A Compounding Factor in the Assessment of Bioavailability	159
<i>P. Ruggiero</i>	
Evaluation of Soil Adsorption-Desorption Capacity for the Assessment of Pesticide Bioavailability	207
<i>M. Gennari and C. Gessa</i>	
Bioavailability of Organic Xenobiotics in the Environment: A Critical Perspective	227
<i>P. Baveye and R. Bladon</i>	

Part III. Processes that Control Bioavailability

Physico-Chemical Characterization, Reactivity and Biodegradability of Soil-Organic Matter	251
<i>J. Berthelin, C. Munier-Lamy, J.-M. Portal and F. Toutain</i>	
Organic Pollutants Associated with Macromolecular Soil Organic Matter and Natural Formation of Bound Residues	297
<i>H. H. Richnow, E. Annweiler, W. Fritsche and M. Kästner</i>	
Phase-Distributions of Hydrophobic Chemicals in the Aquatic Environment: Existing Partitioning Models are Unable to Predict the Dissolved Component in Several Common Situations	327
<i>O. Gustafsson and P. Gschwend</i>	
Bioavailability of Xenobiotic Organic Compounds to Remediate Soil Containing Clay Fractions: Limits of Engineering Solutions	349
<i>M. Elektorowicz, L. Ju and J.A. Oleszkiewicz</i>	
Effect of PAHs and Heavy Metals on Activity of Soil Microflora*	377
<i>B. Smreczak, B. Maliszewska-Kordybach and S. Martyniuk</i>	
Transport of Organic Xenobiotics in the Environment	381
<i>B. L. Hoyle and P. Baveye</i>	

Part IV. Strategies to Modify Bioavailability in Situ

Limited Bioavailability of Organic Contaminants in the Environment: Policy Implications	409
<i>W. Verstraete</i>	
The Role of Plants in the Remediation of Contaminated Soils: Phytoremediation of Soils	429
<i>J.-L. Morel, C.H. Chaineau, M. Schiavon, and E. Lichtfouse</i>	

Reduction of the Bioavailability of PAHS in Heavily Contaminated Soils and Sediments Treated via a Physico-Chemical Process.....	451
<i>J. Newton, P. Baveye and M. Spagnuolo</i>	

Surfactants-Enhanced Bioremediation: A Review of the Effects of Surfactants on the Bioavailability of Hydrophobic Organic Chemicals in Soils	463
<i>Ryan N. Jordan and Alfred B. Cunningham</i>	

Subject Index.....	497
