1	Introduction	1
1.1	The Problem and the Goal	1
1.2	Clinical Presentation	2
1.2.1	Temporal Bone, Skull Base, and Cerebellopontine Angle	2
1.2.2	Orbit	3
1.2.3	Nasopharynx and Paranasal Sinuses	3
1.2.4	Salivary Glands	3
1.2.5	Oral Cavity and Oropharynx	3
1.2.6	Hypopharynx and Larynx	4
1.2.7	Neck	4
1.2.8	Temporomandibular Joint	4
1.3	Imaging Modalities in the Head and Neck	4
1.3.1	Conventional Roentgenology	4
1.3.2	Angiography	5
1.3.3	Ultrasound	5
1.3.4	Computer-Assisted Techniques	5
1.4	Methods of Treatment	6
1.4.1	Surgery	6
1.4.2	Radiotherapy	6
1.4.3	Chemotherapy and Radiochemotherapy	6
2	Basics of Magnetic Resonance Imaging	9
2.1	Principles of Magnetic Resonance	9
2.1.1	Magnetism at the Atomic and Nuclear Level	9
2.1.2	Resonance	10
2.1.3	Relaxation	10
2.1.4	Image Acquisition	11
2.2	Parameters of MRI	12
2.2.1	Field Strength	12
2.2.2	Repetition Time	12
2.2.3	Echo Time	13
2.2.4	Resolution	13
2.2.5	Multiple Acquisitions	13
2.2.6	Signal-to-Noise Ratio	13
2.2.7	Contrast-to-Noise Ratio	13
2.3	Equipment	13
2.3.1	Magnets	13
2.3.2	Radiofrequency Equipment	14

2.4	Pulse Sequences and Special Techniques	14
2.4.1	Spin-Echo Sequences	14
2.4.2	Fast Imaging	15
2.4.3	MR Angiography: Basic Physics	15
2.4.4	3D Imaging	20
2.5	Biologic Effects and Safety Considerations	24
2.5.1	Biologic Effects	25
2.5.2	Safety Considerations	27
2.5.3	Summary	28
3	Examination Technique	31
3.1	Coil Technology	31
3.2	Sequences and Specific Examination Protocols	31
3.2.1	Petrous Part, Middle Skull Base, and Face	31
3.2.2	Oropharynx and Neck	32
3.3	Fast Sequences and Dynamic MRI	32
4	Contrast Media	34
4.1	Basic Principles	34
4.1.1	The Theory of Proton Relaxation	35
4.1.2	Contrast Enhancement	35
4.2	Pharmacology of Gd-DTPA	39
4.3	Safety Profile of Gd-DTPA	39
4.4	Examination Protocols	40
4.4.1	Sequences	40
4.4.2	Subtraction Technique	41
4.4.3	Dynamic MRI	42
4.4.4	Oral Administration of Contrast Medium	42
4.5	Clinical Indications	43
4.5.1	Normal Topography	43
4.5.2	Benign Tumors	43
4.5.3	Malignant Tumors	43
4.5.4	Posttreatment Control	44
4.5.5	Inflammatory Disease	45
4.6	Summary	45
5	Signal Intensity and Relaxation	46
5.1	In Vivo Results	46
6	Temporal Bone, Middle Skull Base, and Cerebellopontine Angle	48
6.1	Clinical Findings	48
6.2	Examination Technique	49

6.3	The Topographic Basis for the Evaluation of MR Images	49
6.4	Sensitivity and Specificity of MRI in Relation to Other Imaging Modalities	54
6.4.1	The Value of the Various MRI Sequences	56
6.5	Acoustic Neuroma	56
6.5.1	Classification	57
6.5.2	MRI Characteristics	58
6.6	Other Neuromas	64
6.7	Glomus Tumors	65
6.7.1	Classification	66
6.7.2	MRI Characteristics	66
6.8	Meningioma	73
6.9	Epidermoid	76
6.10	Cholesteatoma and Other Tumors of the Pyramid Apex	78
6.11	Tumors of the Posterior Cranial Fossa	78
6.12	Overall Efficacy of MRI	79
6.13	Diagnostic Strategy	80
7	Orbit	83
7.1	Clinical Findings	83
7.2	Examination Technique	83
7.3	Topographic Relations	84
7.3.1	Eyeball	85
7.3.2	Nerves	85
7.3.3	Blood Vessels	85
7.3.4	Muscles and Fatty Tissue	85
7.3.5	Lacrimal Gland	87
7.3.6	Bony Borders	87
7.4	Ocular Lesions	87
7.4.1	Congenital Lesions.	87
7.4.2	Traumatic Lesions	87
7.4.3	Inflammation	88
7.4.4	Tumors	88
7.5	Optic Nerve/Sheath Lesions	90
7.5.1	Nontumorous Enlargement	90
7.5.2	Tumorous Enlargement	90
7.6	Intra- and Extraconal Lesions	92
7.6.1	Pseudotumor	92
7.6.2	Tolosa-Hunt Syndrome	92
7.6.3	Graves' Disease	92
7.6.4	Lymphoma	93
7.6.5	Malignant Lesions	93
7.6.6	Benign Lesions	93
7.6.7	Vascular Lesions	97
7.6.8	Lacrimal Gland Lesions	97
7.7	Summary	98

8	Nasopharynx and Paranasal Sinuses	100
8.1	Clinical Findings	100
8.2	Examination Technique	101
8.3	Topographic Relations	101
8.3.1	Nasopharynx	101
8.3.2	Parapharyngeal Space	104
8.3.3	Nose and Paranasal Sinuses	104
8.4	Lesions of the Nasopharynx	104
8.4.1	Squamous Cell Carcinoma	104
8.4.2	Lymphoepithelial and Adenoid-Cystic Carcinomas	106
8.4.3	Juvenile Angiofibroma	106
8.4.4	Lymphoid Hyperplasia and Lymphomas	110
8.5	Lesions of the Parapharyngeal Space	110
8.6	Lesions of the Nose and Paranasal Sinuses	112
8.6.1	Inflammatory Changes	112
8.6.2	Squamous Cell Carcinoma	113
8.6.3	Rare Lesions	114
8.7	Value of MRI and Diagnostic Procedure	116
9	Salivary Glands	118
9.1	Clinical Findings	118
9.2	Examination Technique	119
9.3	Topographic Relations	119
9.3.1	Parotid Gland	119
9.3.2	Submandibular and Sublingual Glands	122
9.4	Inflammatory Changes	122
9.4.1	Parotitis	122
9.4.2	Sjögren's Syndrome	122
9.5	Benign Lesions	126
9.5.1	Pleomorphic Adenoma	126
9.5.2	Lymphoepithelial Cysts	126
9.5.3	Warthin's Tumor	127
9.6	Malignant Lesions	130
9.6.1	Adenocarcinoma	130
9.6.2	Adenoid-Cystic Carcinoma	130
9.6.3	Squamous Cell Carcinoma	131
9.6.4	Lymphoma	131
9.6.5	Recurrent Lesions	133
9.7	Value of MRI and Diagnostic Procedure	133
10	Oral Cavity and Oropharynx	137
10.1	Clinical Findings	137
10.2	Examination Technique	139
10.3	Topographic Relations	139
10.4	Squamous Cell Carcinoma	142
10.4.1	Tumor Classification	142
10.4.2	Tonsils and Parapharyngeal Space	143

10.4.3	Oral Cavity and Body of Tongue	145
10.4.4	Vallecula and Base of Tongue	146
10.5	Other Lesions	151
10.5.1	Kaposi Sarcoma	151
10.5.2	Glomus Tumor	151
10.5.3	Adenoma	152
10.5.4	Metastatic Lymph Nodes	152
10.5.5	Paresis of the Hypoglossal Nerve	152
10.5.6	Hemangioma	152
10.5.7	Plasmocytoma	154
10.5.8	Others	154
10.6	Diagnostic Strategy	154
11	Larynx and Hypopharynx	156
11.1	Clinical Findings	156
11.2	Examination Technique	157
11.3	Topographic Relations	158
11.3.1	Hypopharynx	158
11.3.2	Larynx	158
11.4	Tumor Classification	163
11.5	Differential Diagnosis	164
11.6	Characteristic Diagnostic Findings	165
11.6.1	Principles of MRI	165
11.6.2	Tumors	167
11.6.3	Trauma	178
11.6.4	Diagnostic Strategy	179
12	Neck	180
12.1	Clinical Findings	180
12.2	Examination Technique	182
12.3	Topographic Relations	182
12.3.1	Neck Compartments	182
12.3.2	Thyroid Gland	184
12.3.3	Parathyroid Glands	184
12.3.4	Lymph Nodes	184
12.4	Thyroid Gland	185
12.4.1	Diagnostic Concept	185
12.4.2	Anatomic Abnormalities	185
12.4.3	Goiter	186
12.4.4	Nodular Disease	186
12.4.5	Adenoma	187
12.4.6	Conclusions	188
12.5	Parathyroid Glands	188
12.5.1	Diagnostic Concept	188
12.5.2	Nodular Disease	190
12.5.3	Conclusions	191
12.6	Lymph Nodes	191
12.6.1	Diagnostic Concept	191

12.6.2	Inflammatory Lesions	192
12.6.3	Malignant Lymphoma	192
12.6.4	Metastatic Cancer	193
12.6.5	Conclusions	194
12.7	Soft Tissue Masses	196
12.7.1	Inflammation, Abscess	196
12.7.2	Cysts	197
12.7.3	Lipoma	198
12.7.4	Neural Tumors	198
12.7.5	Rhabdomyoma, Rhabdomyosarcoma	200
12.7.6	Chordoma	201
12.7.7	Others	201
12.7.8	Conclusions	201
12.8	Vascular Lesions	202
12.8.1	Glomus Tumor	202
12.8.2	Hemangioma	204
12.9	Value of MRI and Diagnostic Strategy	204
13	Temporomandibular Joint	207
13.1	Clinical Approach	207
13.2	Examination Technique	208
13.3	Topographic Relations	209
13.3.1	Mandibular Condyle	210
13.3.2	Mandibular Fossa	210
13.3.3	Articular Disk	210
13.3.4	Mandibular Movement	213
13.4	MRI and Clinical Findings	214
13.4.1	Traumatic Injuries	214
13.4.2	Arthritis	215
13.4.3	Internal Derangement	216
13.4.4	Hypermobility of the Mandibular Condyle	218
14	Three Dimensional MRI	224
14.1	Principles	224
14.1.1	Equipment and Sequences	224
14.1.2	Value of Different Sequences	224
14.1.3	Value of Gd-DTPA	225
14.2	Skull Base, Face, and Neck	226
14.3	Technique and Prospects	231
15	Clinical Application of Magnetic Resonance Angiography	233
15.1	Selective Arterial MRA	233
15.1.1	Technique and Indications	233
15.1.2	Normal Topography	235
15.1.3	Pathological Findings	236
15.2	Selective Venous MRA	238

15.2.1	Technique and Indications	238
15.2.2	Normal Topography	242
15.2.3	Pathologic Findings	242
16	Magnetic Resonance Spectroscopy	246
16.1	Technical Considerations	246
16.1.1	Introduction	246
16.1.2	Basic Physics of MRS	246
16.1.3	Field Strength	247
16.1.4	Appropriate Nuclei	247
16.1.5	Calculation of pH	248
16.1.6	Examples of Localization Techniques	248
16.1.7	MRS Investigation Procedure	250
16.2	Clinical Spectroscopy of the Head and Neck	250
16.2.1	Examination by Means of Surface Coils	251
16.2.2	Examination by Means of ISIS	255
16.2.3	Follow-Up Studies During Therapy	259
16.3	Discussion	259
16.4	Prospects	260
17	Conclusions	262
	Subject Index	263
