
Development and application of high-resolution isotope techniques to resolve coupled soil-plant water dynamics

**Thesis submitted in partial fulfillment of the requirements of
the degree Doctor rer. nat. of the
Faculty of Environment and Natural Resources,
Albert Ludwig University,
Freiburg im Breisgau, Germany**

**by
Till H. M. Volkmann**

**Freiburg im Breisgau, Germany
2016**

Table of contents

Table of contents.....	1
List of figures.....	3
Summary.....	5
Zusammenfassung.....	9
1. Introduction	13
1.1 General motivation	13
1.2 Plant water use and uptake – direct interactions with soil water	14
1.3 Plant controls on infiltration – indirect interactions with soil water	16
1.4 Stable isotopes for studying soil water flow and plant water uptake.....	18
1.5 Research gaps	19
2. Objectives and thesis structure.....	23
3. Study site and experimental design	25
3.1 Study site	25
3.2 Soil preparation and planting.....	26
3.3 Preparations for water supply manipulation experiments.....	27
3.4 Meteorological and hydrometric instrumentation	28
3.5 In-situ monitoring of pore water stable isotopes.....	28
3.6 In-situ monitoring of transpiration and evaporation water stable isotopes	30
3.7 Sampling of soil and root system properties	30
4. Summary of studies 1 and 2.....	31
4.1 Novelty	31
4.2 Description	32
5. Summary of study 3	33
5.1 Introduction	33
5.2 Materials and methods	33
5.3 Results and discussion.....	34
5.4 Conclusions	36
6. Summary of study 4	37
6.1 Introduction	37
6.2 Materials and methods	37

6.3	Results and discussion.....	38
6.4	Conclusions	39
7.	Summary of study 5	41
7.1	Introduction	41
7.2	Materials and methods	42
7.3	Results and discussion.....	42
7.4	Conclusions	44
8.	Summary of study 6	47
8.1	Introduction	47
8.2	Materials and methods	48
8.3	Results and discussion.....	49
8.4	Conclusions	50
9.	Summary of study 7	51
9.1	Introduction	51
9.2	Materials and methods	51
9.3	Results and discussion.....	53
9.4	Conclusions	54
10.	Overall discussion.....	57
10.1	Value and limitations of in-situ stable water isotope monitoring techniques	57
10.2	Plant water uptake dynamics during drought and rewetting.....	60
10.3	Plant controls on soil water dynamics during rewetting.....	64
11.	Synthesis	67
11.1	Conclusions	67
11.2	Outlook.....	68
	Acknowledgments	71
	References.....	73
	List of publications and declaration of authorship	87
	Appendix A – Study 5.....	91
