Chapter 1 Soil Acidification and Alkalinization

N. van Breemen

1	Introduction	1
2	Definitions	1
3	Effects of Addition of Dissolved Strong Acid or Base	3
4	Internal Acid Production in Soils	4
5	Assimilation of Minerals by Biota	4
6	Redox Processes	5
7	Order of Magnitude of Δ ANC by Various Groups of Processes	6
	References	7

Chapter 2 Proton Sinks in Soil Controlling Soil Acidification

M. G. M. Bruggenwert, T. Hiemstra, and G. H. Bolt

1	Introduction	8
2	Survey of Proton Sinks in Soil	9
3	Adsorption of Protons by Soil Constituents	12
4	Proton Consuming Dissolution Reactions	16
5	Secondary Reactions	21
5.1	Influence of Clay Minerals on Al-Speciation and Protonation of AlOH-Groups	21
5.2	Al-Saturation and pH Buffer Capacity of Clay Minerals	25
	References	26

Chapter 3 An Ecosystem Approach to Soil Acidification

B. Ulrich

1	Implications of the Material Balance of the Ecosystem for Soil Acidification	28
2	Ecosystem Environment and Ecosystem Compartments	29
3	Can Ecosystem Theory be Based on Thermodynamic Laws? ...	31
4	A Mathematical Model of Terrestrial Ecosystems	32
5	Definitions of Acids and Bases in Soil	33
6	Inputs of Acids and Bases into Ecosystems	35

6.1 Deposition of Air Pollutants	35
6.2 The Role of Silicate Weathering	38
7 Input/Output Relations	38
8 Calculation of Proton Balances	46
9 State Variables of the Acid/Base Status of the Ecosystem	50
9.1 Buffer Ranges in Soil	50
9.2 Carbonate and Silicate Buffer Range	52
9.3 Cation Exchange Buffer Range	53
9.4 Aluminum and Iron Buffer Range	55
10 Assessment of Changes in Soil Acidity	56
11 The Temporal and Spatial Pattern of Soil Acidity	59
12 Interrelationship Between Ecosystem Functioning, Changes in Acid/Base Status of Soil, and Soil Development ...	62
12.1 Stable Ecosystems Close to Steady State	63
12.2 The Aggradation Phase	70
12.3 The Phase of Humus Disintegration	72
12.4 The Phase of Buildup of a Decomposer Refuge	73
12.5 The Phase of Podzolization	73
12.6 Krypto-Podzolization	74
12.7 Deacidification	74
References	75

Chapter 4 Influence of the Acid/Base Status on the Formation and Interactions of Acids and Bases in Soils

M. H. B. Hayes

1 Introduction	80
2 Small Organic Acids in Soils	80
3 Macromolecular Acids in Soils	84
3.1 Humic Substances	85
4 Organic Bases in Soils	92
5 Influences of Organic Acids and Bases in Soils	93
6 Summary and Conclusions	93
References	95

Chapter 5 The Chemistry of Aluminium, Iron and Manganese Oxides in Acid Soils

E. Paterson, B. A. Goodman, and V. C. Farmer

1 Introduction	97
2 Aluminium Oxides	98
2.1 Soil Species and Their Solubility	98
2.2 Reactivity of Allophane and Hydroxyaluminium Interlayers ...	104
3 Iron Oxides	105
3.1 Forms and Occurrence	105

3.2	Solution Chemistry of Iron in Soils	107
3.3	Surface Chemistry of Metal Oxides	110
4	Manganese Oxides	114
4.1	Mineralogy	114
4.2	Solubility	116
4.3	Sorption	117
	References	120

Chapter 6 Assessing the Solubilities and Reaction Kinetics of Aluminous Minerals in Soils

H.M. May and D.K. Nordstrom

1	Introduction	125
2	Experimental Determination of the Stabilities of Aluminous Minerals	126
2.1	The $\text{Al}_2\text{O}_3\text{-H}_2\text{O}$ System: Aluminium Hydroxides and Oxyhydroxides	127
2.2	The $\text{Al}_2\text{O}_3\text{-SO}_3\text{-H}_2\text{O}$ System: Aluminum Sulfate Minerals in Acid Systems	131
2.3	The $\text{Al}_2\text{O}_3\text{-SiO}_2\text{-H}_2\text{O}$ System: The Aluminosilicate Clay Minerals	132
3	Kinetics of Aluminous Mineral Precipitation/Dissolution Reactions	135
3.1	Kinetics of Hydroxy-Aluminium Solids Formation and Dissolution	136
3.2	Kinetics of Aluminosilicate Mineral Formation and Dissolution	140
4	Interaction of Aluminous Mineral Stabilities and Reaction Kinetics in Soils and Other Terrestrial Systems ...	141
4.1	Acidification Response in Natural Waters and Soils	141
4.2	Watershed-Scale Weathering Phenomena, Rates and Models ...	143
	References	145

Chapter 7 Nutrient Status and Toxicity Problems in Acid Soils

M.E. Sumner, M. V. Fey, and A.D. Noble

1	Introduction	149
2	Soil Acidity and Nutrient Status	150
2.1	Nitrogen	152
2.2	Phosphorus	153
2.3	Potassium	155
2.4	Calcium	157
2.5	Magnesium	158
2.6	Sulphur	159
2.7	Copper	161
2.8	Zinc	161

2.9	Manganese	161
2.10	Iron	164
2.11	Boron	164
2.12	Molybdenum	165
2.13	Silicon	165
3	Toxicity Problems in Acid Soils	167
3.1	Manganese Toxicity	167
3.2	Al Toxicity in Relation to Ca Level and pH	167
3.3	Al Toxicity and Soil Organic Matter	168
3.4	Al Toxicity, Soil Solution Ionic Strength, and the Effect of Soil Drying Cycles	169
4	Ion Activities in the Soil Solution: An Alternative Perspective to Soil Acidity Problems	169
4.1	Relationship of Nutrient Uptake to Chemical Potentials	171
4.2	Chemical Potentials and Root Response to Ca and Al	173
5	Concluding Remarks	175
	References	178

Chapter 8 Effects of Soil Acidity on Plant Associations

M. Runge and M. W. Rode

1	Introduction	183
2	Effects of Single Factors	184
2.1	Concentration of Ca-Ions	184
2.2	Concentration of H-Ions	187
2.3	Concentration of Al-Ions	188
2.4	NH ₄ /NO ₃ Ratio	191
3	Interactions	191
3.1	Interaction of Ca with H and Al	191
3.2	Interaction of the N-Form with H and Al	196
4	Conclusions	198
	References	199

Chapter 9 The Transfer of Acidity from Soils to Surface Waters

J. O. Reuss

1	Introduction	203
2	Acid Neutralizing Capacity in Water	203
3	Acid Neutralizing Capacity in Soil Solutions	207
4	Quantification of the Processes	208
5	Other Processes	215
6	Conclusions	216
	References	217

Subject Index	219
