

Table of Contents

Evolutionary Design of Electronic Circuits

Two-Step Incremental Evolution of a Prosthetic Hand Controller Based on Digital Logic Gates	1
<i>J. Torresen</i>	
Untidy Evolution: Evolving <i>Messy</i> Gates for Fault Tolerance	14
<i>J.F. Miller and M. Hartmann</i>	
Evolutionary Design Calibration	26
<i>T. Schnier and X. Yao</i>	
Implementation of a Gate-Level Evolvable Hardware Chip.....	38
<i>M. Iwata, I. Kajitani, Y. Liu, N. Kajihara, and T. Higuchi</i>	
A VLSI Implementation of an Analog Neural Network	
Suited for Genetic Algorithms	50
<i>J. Schemmel, K. Meier, and F. Schürmann</i>	
Initial Studies of a New VLSI Field Programmable Transistor Array	62
<i>J. Langeheine, J. Becker, S. Fölling, K. Meier, and J. Schemmel</i>	

Embryonic Electronics

An Embryonics Implementation of a Self-Replicating Universal Turing Machine	74
<i>H.F. Restrepo and D. Mange</i>	
Asynchronous Embryonics with Reconfiguration	88
<i>A.H. Jackson and A.M. Tyrrell</i>	
Embryonics: Artificial Cells Driven by Artificial DNA.....	100
<i>L. Prodan, G. Tempesti, D. Mange, and A. Stauffer</i>	

Biological-Based Systems

A Self-Repairing and Self-Healing Electronic Watch: The BioWatch	112
<i>A. Stauffer, D. Mange, G. Tempesti, and C. Teuscher</i>	
Shrinking the Genotype: L-systems for EHW?	128
<i>P.C. Haddow, G. Tufte, and P. van Remortel</i>	
Multi-layered Defence Mechanisms: Architecture, Implementation and Demonstration of a Hardware Immune System	140
<i>D.W. Bradley, A.M. Tyrrell</i>	

Ant Circuit World: An Ant Algorithm MATLAB TM Toolbox for the Design, Visualisation and Analysis of Analogue Circuits	151
<i>M.R. Tamplin and A. Hamilton</i>	

Evolutionary Robotics

Human-Like Dynamic Walking for a Biped Robot Using Genetic Algorithm	159
<i>J.G. Kim, K.-g. Noh, and K. Park</i>	
Effect of Fitness for the Evolution of Autonomous Robots in an Open-Environment	171
<i>Md.M. Islam, S. Terao, and K. Murase</i>	
Incremental Evolution of Autonomous Robots for a Complex Task	182
<i>Md.M. Islam, S. Terao, and K. Murase</i>	
Multi-agent Robot Learning by Means of Genetic Programming: Solving an Escape Problem	192
<i>K. Yanai and H. Iba</i>	

Evolutionary Optimization

Placing and Routing Circuits on FPGAs by Means of Parallel and Distributed Genetic Programming	204
<i>F. Fernández, J.M. Sánchez, M. Tomassini</i>	
A Massively Parallel Architecture for Linear Machine Code Genetic Programming	216
<i>S.E. Eklund</i>	
Self-Organized Evolutionary Process in Sets of Interdependent Variables near the Midpoint of Phase Transition in K-Satisfiability	225
<i>M. Korkin</i>	
Evolutionary Optimization of Yagi-Uda Antennas	236
<i>J.D. Lohn, W.F. Kraus, D.S. Linden, and S.P. Colombano</i>	

Evolutionary Learning

Extraction of Design Patterns from Evolutionary Algorithms Using Case-Based Reasoning	244
<i>E. Islas Pérez, C.A. Coello Coello, and A. Hernández Aguirre</i>	
Balancing Samples' Contributions on GA Learning	256
<i>K.S. Leung, K.H. Lee, and S.M. Cheang</i>	
Solving Partially Observable Problems by Evolution and Learning of Finite State Machines	267
<i>E. Sanchez, A. Pérez-Uribe, and B. Mesot</i>	

GA-Based Learning of $kDNF_n^s$ Boolean Formulas	279
<i>A. Hernández Aguirre, B.P. Buckles, and C. Coello Coello</i>	
Applications	
Polymorphic Electronics	291
<i>A. Stoica, R. Zebulum, and D. Keymeulen</i>	
Initial Experiments of Reconfigurable Sensor Adapted by Evolution	303
<i>D. Keymeulen, R. Zebulum, A. Stoica, M. Buehler</i>	
A Lossless Compression Method for Halftone Images Using Evolvable Hardware	314
<i>H. Sakanashi, M. Iwata, and T. Higuchi</i>	
Evolvable Optical Systems and Their Applications	327
<i>H. Nosato, Y. Kasai, T. Itatani, M. Murakawa, T. Furuya, and T. Higuchi</i>	
Author Index	341
