

Contents

1	An Introduction to Lake Taihu	1
1.1	Hydrography and Drainage Basin	1
	<i>Shuncaì Sun and Rui Mao</i>	
1.1.1	Lake Morphology and Drainage Basin	1
1.1.2	Formation and Development	6
1.1.3	Influence of Lake Formation on the Aquatic Environment	7
1.2	Hydrography and Water Resources	11
	<i>Rui Mao, Pengzhu Xu, and Junfeng Gao</i>	
1.2.1	Hydrography	11
1.2.2	Water Resources and Water Balance	15
1.3	Pollution and Eutrophication	23
	<i>Wenyu Huang, Gang Xu, Qinglong Wu, and Boqiang Qin</i>	
1.3.1	Development of the Water Quality in Lake Taihu and Its Rivers	23
1.3.2	Pollutant Emissions and Amounts Flowing into the Lake	25
1.3.3	Causes of Worsening Water Quality	36
1.4	Swamping of Eastern Taihu Bay	43
	<i>Wenchao Li</i>	
1.4.1	Current Status of Swamping	44
1.4.2	The Development of Swamping in Eastern Taihu Bay and Its Driving Forces	55
	References	66
2	Optical Properties of Lake Taihu and Radiative Transfer Simulation	69
2.1	Optical Properties and Their Ecological Significance	69
	<i>Yunlin Zhang</i>	
2.1.1	Inherent Optical Properties of Lake Taihu	71
2.1.2	Apparent Optical Properties of Lake Taihu	85
2.1.3	Modelling of Transparency	90
2.1.4	Ecological Effect of Underwater Radiation	92
2.2	Simulation of Radiative Transfer Between the Atmosphere and the Water Body	97
	<i>Qiming Cai and Yunlin Zhang</i>	

2.2.1	The Radiative Transfer Spectrum Model in the Atmosphere ..	97
2.2.2	Model of Light Transmission in Water	103
	References	109
3	Hydrodynamics and Its Effects on the Aquatic Ecosystem	115
3.1	Wave Characteristics	116
	<i>Liancong Luo and Boqiang Qin</i>	
3.1.1	Wind	116
3.1.2	Waves	116
3.1.3	Wave Characteristics	116
3.1.4	Wave Spectrum	120
3.2	Field Investigations and Analysis of Currents	122
	<i>Boqiang Qin and Liancong Luo</i>	
3.3	Modelling of Lake Hydrodynamics	128
	<i>Liancong Luo and Boqiang Qin</i>	
3.3.1	Review of Modelling in Lake Taihu	128
3.3.2	Model Description	130
3.3.3	Model Verification	135
3.3.4	Current Field and Dominant Wind	137
3.4	Effects of Hydrodynamics on the Ecosystem	141
	<i>Boqiang Qin and Liancong Luo</i>	
3.4.1	Mechanism of Sediment Resuspension in Lake Taihu	141
3.4.2	Critical Stress for Sediment Resuspension	143
	References	147
4	Sediment–Water Exchange and Its Significance	151
4.1	Sedimentation Rate and Distribution of Sediment	151
	<i>Guangwei Zhu</i>	
4.1.1	Sedimentation Rate	152
4.1.2	Soft Sediment Distribution	156
4.2	Physicochemical Properties of Sediments	159
	<i>Guangwei Zhu</i>	
4.2.1	Particle Size Distribution of Surface Sediments	159
4.2.2	Water Content and Porosity of Sediments	161
4.2.3	The <i>pH</i> and <i>Eh</i> of Sediments	164
4.2.4	The Spatial and Temporal Distribution of Nutrients in Sediments and Pore Water	166
4.2.5	Forms of Phosphorus in Sediments	168
4.3	Experimental Studies on Nutrient Exchange at the Sediment–Water Interface	173
	<i>Lu Zhang and Wenchao Li</i>	
4.3.1	Phosphorus Release and Sorption Under Dynamic Disturbance Conditions	173
4.3.2	Phosphorus Adsorption Saturation of Sediment from Eastern Taihu Bay	178

4.4	Conceptual Model of Internal Nutrient Loading	182
	<i>Boqiang Qin, Guangwei Zhu, and Lu Zhang</i>	
4.4.1	Effects of Wind-Wave Disturbance on Nutrient Concentrations in the Water	182
4.4.2	Internal Loading of Nutrients	187
4.4.3	Conceptual Model of Internal Loading of Nutrients in Large Shallow Lakes Such as Lake Taihu	193
	References	194
5	Physiological and Ecological Characteristics of Blue-Green Algae in Lake Taihu	197
5.1	Effect of Alkaline Phosphatase on Algal Blooms.....	197
	<i>Guang Gao</i>	
5.1.1	Alkaline Phosphatase in Lake Water	197
5.1.2	Alkaline Phosphatase and the Phosphorus Cycle	200
5.1.3	Relationship Between Alkaline Phosphatase and Algal Blooms	202
5.2	Relationship Between the Lake Taihu Microecosystem Structure and Algal Blooms	206
	<i>Guang Gao and Liuyan Yang</i>	
5.2.1	Microbial Food Webs, Organic Particles, and Algal Blooms ..	206
5.2.2	Growth Characteristics of Bacteria Attached to Algae	213
	References	224
6	The Lake Ecosystem: Structure and Development.....	229
6.1	Characteristics of Chlorophyll <i>a</i> and Primary Production	229
	<i>Dinglian Yang, Yunlin Zhang, and Weimin Chen</i>	
6.1.1	Chlorophyll <i>a</i> (Chl <i>a</i>)	230
6.1.2	Phytoplankton Primary Production in Meiliang Bay	231
6.1.3	The Relationship Between Chl <i>a</i> and Primary Production ...	233
6.1.4	Ecological Factors Affecting Primary Production	234
6.1.5	Simulated Water Current Experiment and Primary Production	237
6.2	Phytoplankton Community Structure: Succession and Response to the Environment	240
	<i>Wanping Zhou and Weimin Chen</i>	
6.2.1	Phytoplankton Community Structure	240
6.2.2	Changes in the Phytoplankton from the 1950s to the 1990s...	242
6.2.3	Response of the Phytoplankton to Changes in the Aquatic Environment	248
6.3	Analysis of the Zooplankton.....	254
	<i>Weimin Chen</i>	
6.3.1	Zooplankton Composition and Abundance	254
6.3.2	Succession of Dominant Species	260

6.3.3	Succession of Zooplankton and Response to Environmental Change	260
6.4	Species Composition, Succession, and Environmental Response of Zoobenthos	265
	<i>Weimin Chen</i>	
6.4.1	Community Structure	265
6.4.2	Distribution of Zoobenthos	266
6.4.3	Response of Zoobenthos to Environmental Changes	271
6.5	Fish Composition and Fisheries	276
	<i>Weimin Chen and Qinglong Wu</i>	
6.5.1	Fish Population Structure	276
6.5.2	Changes in the Composition of Fish Catches	277
6.5.3	Development of Hatchery Fishery and Its Effect on the Environment of the Lake	280
6.6	Structure and Succession of the Aquatic Vegetation	285
	<i>Weimin Chen</i>	
6.6.1	Species Composition of the Aquatic Vegetation	285
6.6.2	Succession of Aquatic Vegetation in Eastern Taihu Bay and Western Lake Taihu	286
6.6.3	Effects of the Environment on the Succession of the Aquatic Vegetation	291
	References	292
	Appendices	295
	A Species of Phytoplankton in Lake Taihu	295
	B Species of Zooplankton in Lake Taihu	301
	C Species of Zoobenthos in Lake Taihu	304
	D Fish Species in Lake Taihu	306
	E Species of Aquatic Vegetation in Lake Taihu	310
